### Full product description

#### Napájecí zdroj PoE 24 V Extralink

Napájecí zdroj dodává energii prostřednictvím vybraných vláken krouceného kabelu do síťových zařízení, jako jsou přístupové body, kamery atd. Toto řešení umožňuje přenášet síťová data a zároveň zajišťuje napájení.

## PoE 24V 0.5A power supply

This power supply provides electrical power via selected strands of the twisted-pair cable to network devices such as APs, cameras, etc., allowing network data to be transmitted while providing power. This enables network data to be transmitted while also providing power.

**PoE power supplies are widely used in various areas where there is a need to power network devices without the need for separate power supplies.**

**VoIP telephones**

These can be easily installed in offices or other locations without the need for a separate power supply.

**Network equipment**

Other network devices such as switches, routers and similar devices can also be powered by PoE.

**Wireless access points**

Facilitates the installation and deployment of devices to ensure better wireless coverage.

**External installations**

In the case of outdoor installations, such as outdoor surveillance and signalling systems, PoE power supplies allow for easy installation without the need for complex power supply solutions.

**IP cameras**

Allows cameras to be easily installed in a variety of locations, even where power sockets are not available

**Intelligent lighting and building management systems**

Some lighting and building management systems can be powered by PoE, which simplifies energy management and enables easy installation.
