Full product description

Storage on your terms - Extralink

Extralink's **set of two 5-level shelving** units is a practical solution for those who want to keep things organized and use space efficiently. Thanks to **the dimensions of 180x40x40 cm** and **the load capacity of the shelves up to 175 kg**, this product will work in many places, no matter what you plan to store.

Robust design and durability

Each shelf can withstand a load of up to **175 kg**, making the rack suitable for storing heavier items such as tools, food supplies or documents. **The metal construction** and **MDF panels** ensure stability and resistance to daily use. As a result, the product will work well both in a warehouse and in a home laundry room or garage.

Quick and screwless installation

You don't have to worry about complicated **assembly- the bookcase assembles with a push-fit**, which means no screws or specialized tools are needed to assemble it. The whole process takes **about 15 minutes**, and the intuitive design allows you to **quickly modify the height of the shelves** according to your needs.

Configurable and flexible setup

If you need lower shelving, this set gives you **the option of splitting one tall shelving unit into two smaller ones**. This is great for rooms with limited height, or if you want to fit storage into different areas. You can also freely **change the spacing between shelves** to suit the size of the items you are storing.
