Price: **190.90 zł** gross / 155.20 zł net

Manufacturer: EXTRALINK

Referention number: DNXGHINNGRMMJI

Information:

The Extralink bicycle lighting set combines a front LED light with a built-in counter and a rear light, ensuring good visibility and greater safety on the road. The counter helps you monitor speed and distance, while the waterproof design performs well in rain and difficult conditions. Battery-powered operation with convenient USB charging eliminates the need to replace batteries. Four lighting modes for each light, including strobe, allow you to adjust the lighting to riding conditions.

Full product description

Extralink | Bike Light Set with Counter and Rear Light

Extralink Bicycle Light Kit is a reliable solution that will give you excellent **visibility** on the road, both day and night. The kit consists of a **front light** with a counter and a **rear light**, making you clearly visible from all sides. **The LED bicycle** light provides adequate illumination, and the built-in **bicycle counter** will help you monitor speed and distance. Thanks to its **waterproof design**, the kit is resistant to various weather conditions, making it suitable for all conditions.

Built-in bicycle counter

The kit includes a **built-in bike counter** that allows you to monitor your **speed and distance** while riding. This gives you full control over your performance and allows you to track your progress.

Waterproof design

The set is **waterproof**, which means that **the bike lights** will work reliably, even on rainy days. **The waterproof** design means that you can confidently use the lights in different weather conditions without worrying about damaging them. This is an important feature for any cyclist who rides in different seasons.

Convenient USB charging

The **bike light** and **tail light** are **battery** powered, and charging is done via a **USB cable**. This way you don't have to worry about replacing batteries, which is a greener solution. **USB charging** is fast and convenient, and the range of the light is sufficient for long hours of riding.

A variety of light modes

The kit offers **4 modes** for the front light and **4 modes for the tail light**, including a **strobe mode**. You can adjust the light mode to the road conditions and your need for visibility. With such **flexibility**, the lighting will be tailored to any type of driving, keeping you safe and comfortable.
