Information:

Extralink Kids K-476 is a colourful children's playpen measuring 99 × 90 cm, ideal for home and garden. It can serve as a safe play area, a ball pit for balls, or a place to store toys such as blocks and soft toys. The integrated ball-throwing basket adds variety to play and supports the development of hand-eye coordination. Breathable mesh sides ensure good air circulation and allow you to keep an eye on your child, while the colourful animal graphics give it a friendly, childlike appearance.

Full product description

Space for play

Extralink Kids K-476 is a playpen for children measuring 99 × 90 cm, which can serve as a home play area or a ball pit. The designated space allows you to store balls, building blocks, soft toys and other accessories used during a child's daily activities.

Play at home and in the garden

The playpen can be set up in a child's room, living room or in a prepared spot in the garden. The colourful animal graphic gives the structure a child-friendly character, and the clearly defined interior helps organise the space intended for play.

Basket included for play

The integrated basket expands play possibilities by allowing ball throwing at a target. This activity adds variety to time spent in the playpen and helps the child practise hand-eye coordination and control of their movements.

Ball pit function

The inside of the playpen can be filled with light, colourful balls, creating a ball pit for play. The oval shape offers the child space to reach for toys freely, stack blocks and engage in various physical activities.

Breathable sides

The side mesh panels support airflow and make it possible to observe the inside of the playpen from different sides. The fuller, colourful sections of the sides complete the structure and feature friendly animal illustrations.

Space for different kinds of play

Extralink Kids K-476 can be used as a space for playing with balls, blocks, soft toys or a light ball. The combination of a playpen, ball pit and basket allows the type of activity to be changed without having to prepare several separate areas.
