Manufacturer: EXTRALINK

Referention number: DNXGGOKPDRMMJH

Information:

Extralink Kids K-465 is a spacious, hexagonal children's playpen measuring 137 × 120 cm, creating a safe, separate play area at home or in the garden. It is ideal for blocks, soft toys and balls, and when filled with lightweight balls it turns into a ball pit. The transparent, breathable mesh sides ensure good air circulation and allow you to watch your child from every side. The side zip entrance makes it easy to get in and out, and the freestanding design means the playpen can be set up quickly wherever it is needed.

Full product description

Own play area

Extralink Kids K-465 is a children's playpen measuring 137 × 120 cm, helping to set aside a space intended for everyday activity. Its hexagonal shape offers room for balls, building blocks, soft toys and other toys, allowing you to create a home play area or ball pit.

For home and garden

The playpen can be set up in a child's room, living room or on a prepared surface in the garden. Its freestanding design makes it possible to create a play space wherever it is needed at the time.

Spacious interior

The 137 × 120 cm dimensions mean that toys and accessories used during various activities can be arranged inside. The designated space encourages play with building blocks, soft toys or colourful balls, and also helps limit them spreading around the room.

Breathable sides

The side panels made of transparent mesh support free airflow. They also make it possible to observe the inside of the playpen from different sides, while the pink edging gives the whole structure a cohesive, child-friendly look.

Ball pit function

The inside of the playpen can be filled with lightweight balls, creating a home ball pit. This form of play encourages the child to reach, grasp and move, while the raised sides help keep the balls within the designated area.

Zip-fastened entrance

The side entrance allows the child to enter and leave the playpen comfortably. The opening mesh panel can be pulled aside, and after use it can be closed again with a zip fastener.
