### Information:

Extralink Kids K-461 is a foldable children's playpen measuring 140 × 68 cm, creating a safe, designated play area at home or in the garden. The hexagonal design provides space for balls, blocks, soft toys and other toys, and when filled with lightweight balls it turns into a dry ball pit. The breathable mesh sides improve air circulation and allow constant supervision of the child. The foldable design makes it easy to set up, move and store, while the raised sides help keep the play area tidy.

### Full product description

### Children's play area

Extralink Kids K-461 is a foldable children's playpen measuring 140 × 68 cm, helping to set aside space for everyday activities. The hexagonal interior offers room for balls, blocks, soft toys and other toys, allowing you to create a home play area or ball pit.

### Ball pit function

The playpen interior can be filled with lightweight balls, turning it into a ball pit. Raised sides help keep toys within the designated space, while the 140 x 68 cm surface gives the child room to reach, grasp and move freely.

### Foldable design

The foldable design makes it easy to set up the playpen for play, and after use it helps reduce the space needed for storage. The intersecting frame elements support the sides of the hexagonal shape.

### Space for many kinds of play

The playpen can be used as a space for playing with balls, building blocks, and using soft toys and other children's accessories. The designated interior helps organise the activity area and limit toys spreading around the room.

### Breathable sides

Transparent mesh panels support airflow and make it possible to observe the inside of the playpen from different sides. The child can see the surroundings at the same time, and the bright colour scheme with turquoise elements suits a child's space.

## Spacious interior

The hexagonal shape allows the interior to be used for various types of activities. Balls, soft blocks and soft toys can be arranged within the playpen, creating a varied space for a child's independent play under adult supervision.

## For home and garden

Extralink Kids K-461 can be set up in a child's room, living room or on a prepared surface in the garden. The mobile, foldable design makes it possible to move the play area between chosen locations depending on current needs.
