Manufacturer: EXTRALINK

Referention number: DNXGGOKPFRMMKP

Information:

Extralink Kids K-462 is a foldable children's playpen measuring 120 × 68 cm, creating a safe, separate play area at home or in the garden. The hexagonal interior can hold blocks, soft toys, balls and other accessories, while the raised sides help keep things tidy and also work well as a dry ball pit. Breathable mesh panels ensure good air circulation and allow you to watch your child from every side. The foldable design makes it easy to set up, carry and store, and the striking black-and-pink colour scheme suits a child's space well.

Full product description

Own play area

Extralink Kids K-462 is a foldable children's playpen measuring 120 × 68 cm, which helps set aside space for everyday play. The hexagonal interior offers room for building blocks, soft toys, balls and other children's accessories.

Home ball pit

The playpen can be filled with light, colourful balls and used as a ball pit. The raised sides help keep the balls and toys inside the designated area, making it easier to keep the room tidy.

Foldable design

The foldable design makes it easy to set up the playpen for use, and after playtime it helps reduce the space needed for storage. The crossing frame elements support the hexagonal shape of the whole structure.

Breathable panels

The side panels made of mesh support airflow and allow the interior to be observed from different sides. The black sides combined with pink elements create a distinctive colour scheme suited to a child's space.

For home and garden

Extralink Kids K-462 can be set up in a child's room, living room or in a prepared spot in the garden. The foldable form makes it easy to move the structure and organise a play area depending on current needs.

Space for toys

The spacious hexagonal interior allows balls, soft blocks and a few soft toys to be placed in the playpen. The designated area supports various forms of activity and helps gather the toys being used in one place.
