Information:

Extralink Kids is a steel children's playpen 150 × 128 × 66 cm, creating a safe and comfortable play space at home or in the garden. The spacious interior can hold balls, blocks, soft toys and other toys, and the set includes 30 colourful balls. The steel frame with covered edges ensures stability, the side zip entrance makes it easy to use, and the breathable mesh panels let you keep an eye on your child while maintaining air circulation. The light grey design suits a variety of interiors.

Full product description

Play space

Extralink Kids is a steel playpen for children measuring 150 × 128 × 66 cm, which helps create a dedicated area for everyday activities. The spacious interior allows you to place colourful balls, blocks, soft toys and other children's toys inside.

30 balls included

The set includes 30 colourful balls, which make play inside the playpen more varied. The designated space allows the child to reach for the balls, arrange blocks and use their favourite toys under adult supervision.

For home and garden

The playpen can be set up in a child's room, living room or on a suitably prepared outdoor surface. This makes it possible to create a separate play area in a place suited to the current needs of the child and carer.

Steel frame

The structure is based on a steel frame joined with corner elements. Covered upper edges limit the child's direct contact with the tubes, and the 150 × 128 cm dimensions provide space for various forms of calm play.

Opening entrance

The side entrance with a zip fastener makes it easy for the child to get in and out of the playpen. When opened, the panel can be moved aside to create a convenient passage, and then closed again to separate the play area.

Breathable sides

Transparent mesh panels support airflow and make it possible to observe the interior from different sides. The light grey colour scheme means the playpen blends easily with the furnishings of a living room or child's room.
