Information:

Extralink Kids is a steel children's playpen 127 × 127 × 68 cm, creating a safe, separate play area at home or in the garden. The square design with covered edges provides a convenient space for toys, blocks, soft toys and the included 30 colourful balls. Breathable mesh sides improve air circulation and allow the child to be observed from every side, while the zippered side entrance makes it easy to get in and out. The light grey colour suits interiors well.

Full product description

Dedicated play area

Extralink Kids is a steel children's playpen measuring 127 × 127 × 68 cm, which helps create a play space at home. The square design offers room for building blocks, soft toys and the colourful balls included in the set.

For home and garden

The playpen can be set up in a child's room, the living room or on a suitably prepared surface in the garden. The dedicated space makes it possible to keep toys in one place and organise an area for a child's everyday activities.

Steel construction

The steel frame forms the playpen's square structure, and the covered top edges limit direct contact between the child and the frame elements. The 127 x 127 cm dimensions provide space for various toys and children's accessories.

Breathable sides

The mesh side panels support airflow and make it possible to observe the inside of the playpen from different sides. The light grey colour scheme means the structure blends easily with the furnishings of a child's room or living room.

30 balls included

The playpen comes with 30 colourful balls, which make children's play more varied. The interior can also be equipped with soft blocks, plush toys and other accessories, tailoring its contents to the child's current interests.

Opening entrance

The side entrance with a zip fastening makes it easy for the child to get in and out of the playpen. When opened, the panel can be lowered onto the floor, and after use it can be closed again, setting apart a play area.
