Type	Angle bracket
Designation	General purpose

Full product description

Bracket for mounting a satellite dish on the balcony

Steel balcony holder is a good choice for people living in bunker houses or blocks of flats. The shape and dimensions of the holder allow for comfortable mounting of the antenna on the railing. The use of galvanized steel ensures **resistance to corrosion** and other damage.

How to mount the holder on the balcony?

The 250 mm high handle, 500 mm arm length and 38 x 1.5 mm diameter is mounted by means of a cybranch, so **there is no need to drill**. Installation of the antenna bracket is easy and quick, as well as possible change of its position.
