Price: **3,371.49 zł** gross / 2,741.05 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGJQJDRMLPL

Information:

The Extralink LiFePO4 12V 200Ah battery is a modern energy storage solution with a long service life, a high level of safety and complete maintenance-free operation. Thanks to lithium iron phosphate technology, it offers over 2000 operating cycles while retaining approx. 80% of its capacity, a low self-discharge rate of below 3% per month, and no memory effect. It is lightweight, compact and at least half the weight of lead-acid batteries, while the built-in BMS supports safe and stable operation. Ideal for motorhomes, yachts, vehicles, emergency systems and other applications requiring reliable power supply.

Product features

Height	223 mm
Width	520 mm
Depth	237 mm
Battery capacity	200000 mAh
Battery capacity	2560 Wh
Battery voltage	12.8 V
Package weight	23500 g
Package depth	265 mm
Package height	255 mm
Package width	550 mm
Package type	Box
Output current	200 A
Battery technology	Lithium Iron Phosphate (LiFePO4)

Product colour	Black
Product weight	22500 g

Full product description

LiFePO4 battery by Extralink

Extralink LiFePO4 lithium-iron-phosphate batteries with a nominal capacity of **200Ah** offer a whole range of advantages over traditional battery-based solutions made with other technologies. Extralink LiFePO4 means longer life, no maintenance, remarkable safety, lightweight, improved discharge and charging efficiency. LiFePO4 batteries, due to their long life and zero maintenance, **are the best investment for years** to come.

Key features of Extralink LiFePO4 batteries

Fully maintenance-free LiFePO4 batteries

Extralink's 200Ah LiFePO4 batteries do not require active maintenance to extend their life. In addition, these batteries have no **memory effect**, and the low self-discharge rate (<3% per month) of the LiFePO4 battery makes **it possible to store them for longer periods of time**.

Low weight and high power density of LiFePO4 batteries

12V lithium-iron-phosphate (LiFePO4) batteries offer high power density, making the lithium battery relatively small and lightweight. Compared to lead-acid batteries, Extralink's LiFePO4 type provides high energy density and is at least half as light. Choose Extralink LiFePO4 if you want to reduce your concerns about battery weight and size!

LiFePO4 type battery with a large number of duty cycles

LiFePO4 batteries last **more than 2,000 cycles** while maintaining an average of 80% of their rated capacity. In comparison: a traditional lead-acid battery lasts 300-500 cycles at most. The long life makes the **Extralink LiFePO4 battery an excellent economic choice.**

Wide range of LiFePO₄ battery applications

Extralink's LiFePO₄ 12V lithium-iron-phosphate battery is an ideal energy storage for cars, buses, logistics vehicles, boats, emergency power, etc. due to its safety and low cost advantages. **Excellent as a battery for an RV.**
