Full product description

Peace of mind for the parent, joy for the child

The smartwach **takes care of** the **safety of** the little ones, offering caregivers the necessary tools for control and communication. The device allows **constant voice contact** and verification of the child's whereabouts, which affects the psychological comfort of the parent. Robust design and well-thought-out functions make the equipment suitable for everyday use.

Key benefits

- **Constant connectivity:** Ability to make calls and send voice messages.
- **A sense of security:** SOS button and exit notifications.
- **Durability:** IP67-rated water and dust resistance and a robust battery.
- **Convenience of use:** Soft strap and menu in Polish.
- **Parental control:** Discreet listening and management via the app.

Nie tylko zaawansowane funkcje, ale także prosta i łatwa obsługa.

Convenient voice communication

The smartwatch supports **two-way calling**, which allows you to make HD quality **calls**. Thanks to the **micro chat** function, it is possible to send short voice messages, which improves quick exchange of information. An easy-to-read **touchscreen** with a resolution of 128x128 pixels makes the interface easy to use, and an intuitive menu in Polish helps your child use the device independently.

Dwukierunkowe połączenie HD

Wygodna i szybka rozmowa z dzieckiem, wyraźne połączenia
w dowolnym czasie i miejscu

Location and protection zones

Using **LBS and WiFi positioning**, the system assists in determining the user's approximate location. The parent can define a **virtual protective area**, and if the child leaves it, a notification will be sent to the SeTracker2 app. Such functionality contributes to better care for the child when he or she is away from home, such as on the way to school or in the backyard.

Obszar ochronny

Ustaw zakres aktywności dziecka. Jeśli dziecko opuści ustawiony obszar, aplikacja uruchomi alarm.

Creativity and fun

The built-in **HD camera** allows your child to capture interesting moments, which develops their creativity. The photos taken can be easily sent to the parent, sharing the joy of each moment. In addition, the **puzzle games** installed in the watch are a great way to get bored. They develop the ability to think quickly, making the device offer valuable entertainment in free time.

Long battery life

The **680 mAh polymer battery** used offers efficient power management. It allows **up to 7 days of standby operation**, reducing the need to frequently connect the watch to the charger. Convenient **USB charging** and a power-saving system ensure that the device is ready when you need it most.

Długi czas czuwania

Zastosowano baterię o dużej pojemności 680 mAh, która zapewnia normalny czas czuwania przez 10–15 dni

Water and dust resistance

The design of the device meets the **IP67** standard, which means high resistance to dust and short-term immersion in water. The watch will easily survive hand washing, playing in the rain or accidental splashes. The durable plastic casing and **silicone strap** ensure wearing comfort and mechanical strength, which is essential for a child's active lifestyle.

Wodoodporność na głębokość IPX67

Telefon z zegarkiem, który nie boi się wody

Additional utility functions

The device comes with a number of extras, such as a built-in **camera** for taking photos and a **pedometer** that monitors physical activity. A **"silent listening" function** allows parents to discreetly check their child's surroundings. In **school mode**, the watch mutes notifications to help focus on lessons.

Prognoza pogody

Teraz dzieci nie zapomną zabrać ze sobą parasola, gdy wychodzą na dwór.

Smartwatch for kids Extralink Kids Y92 is a useful solution for:

- Parents looking for an alternative to a smartphone for their child.
- Children who need a simple device to contact their caregivers.
- Individuals who want to have remote control of their child's location and safety.
- Active toddlers who need a durable and waterproof gadget.
