shell

Advanced Technology and Functionality

The safe is equipped with an integrated **smart panel** that allows easy operation of the device. **The touchscreen panel** provides convenience for quick password entry and verification of other settings. Thanks to a state-of-the-art **alarm system**, the safe offers a **dual alarm** that activates in the event of an unauthorized opening or tampering attempt. This is an additional functionality that increases the level of protection, ensuring full security of stored items.

Secure storage - protected from children and thieves!

Eco-friendly and Safe Finish

The safe is coated with **environmentally friendly paint**, which ensures not only an aesthetically pleasing appearance, but also care for the environment. The paint is **durable and scratch-resistant**, which allows the safe to maintain its good looks for a long time. The use of **sturdy reinforced bolts** and integrated bending design makes the safe extremely **stable and resistant to any damage**, and its finish gives a sense of confidence and reliability.
