Information:

Extralink Lock Star X-45X is a practical safe for home and office use, designed for storing documents, cash, jewellery, keys and small electronics. Equipped with an electronic panel with a numeric keypad, it allows quick opening with a code, without the need to use a key on a daily basis. The spacious interior makes it easy to organise the most important items, while the sturdy metal housing increases the protection of the contents. The safe can be placed or fixed to the floor or wall, which improves security and reduces the risk of it being moved. It is suitable for a flat, office, reception area, hotel or service point.

Full product description

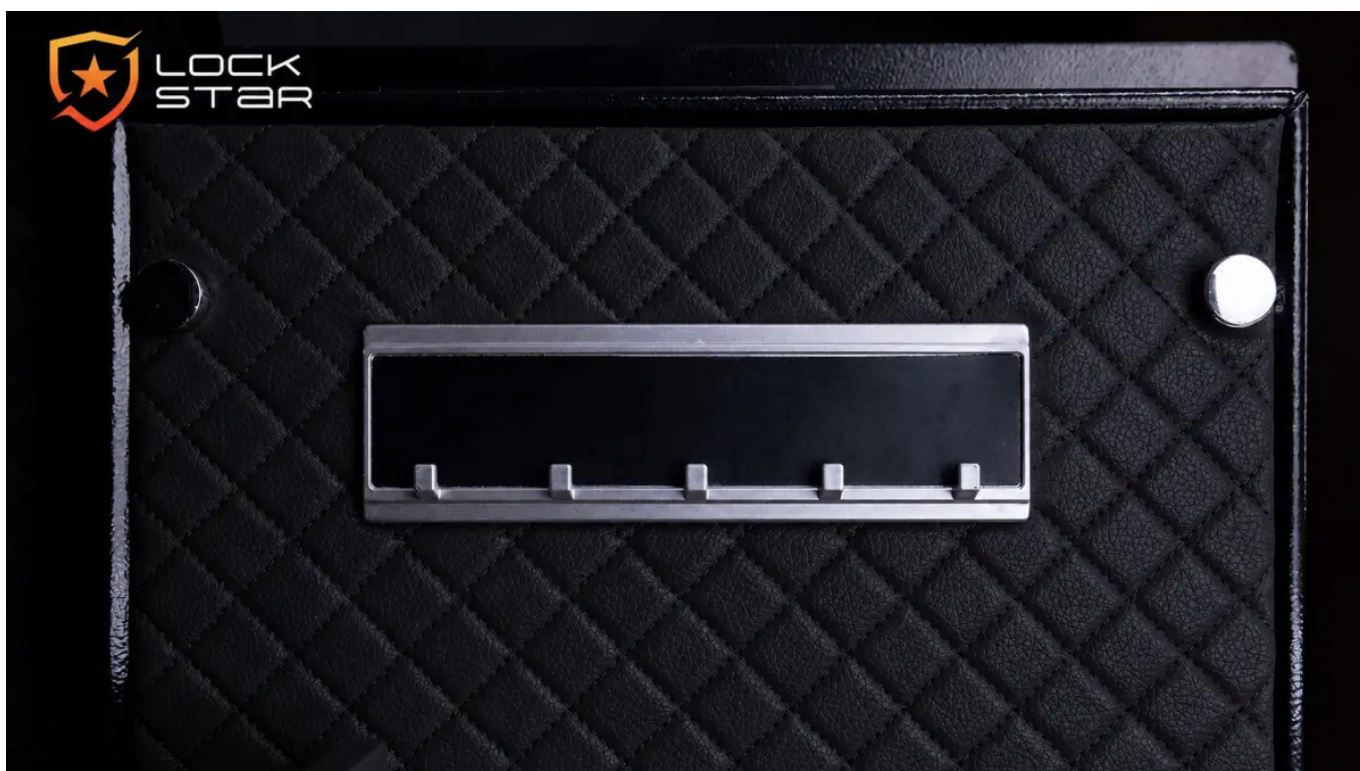

Safe for home and office

Extralink Lock Star X-45X is a safe designed for storing documents, cash, jewellery, keys and small electronics. The solid casing helps restrict access by unauthorised persons, and its versatile design means the safe fits well in a flat, office, reception area, study or company back office.

Convenient everyday use

The electronic panel with a numeric keypad allows the safe to be opened quickly using a code. This solution makes it easier to use the secured space without having to reach for a key each time. It is a practical choice for people who want important items close at hand, but out of easy reach.

Thoughtful interior

The spacious safe compartment allows you to organise the most important items in one place. Inside, you can store documents, data carriers, a wallet, a watch, stamps, cash or other valuable items. Such organisation helps keep things tidy and makes it quicker to find the accessories you need.

Sturdy metal casing

The metal construction provides proper protection for the contents and increases the safe's resistance to everyday use. The door and body create a closed storage space for items that require greater access control. The safe can be used both privately and in the workplace.

Mounting option

The safe can be placed in a chosen location or fixed to the floor or wall, depending on your needs and installation conditions. The mounting holes help reduce the risk of the safe being easily moved, which contributes to greater security for the items stored inside.

For important items

Extralink Lock Star X-45X is ideal as a place for items that should be kept separate from everyday access. It is a practical solution for a home, office, hotel, shop or service point. Simple operation and a functional design help ensure the safety of the contents every day.
