Full product description

Modern Charging Features and Aesthetic Backlighting

The Extralink Lock Star cabinet is a modern solution that combines security features with the convenience of everyday use. Equipped with a **wireless inductive charging** system, it allows easy charging of mobile devices without the need for cables. In addition, the safe offers a **tri-color backlight** with adjustable touch sensitivity for an aesthetically pleasing look and easy operation in different lighting conditions. The **tempered glass** desktop adds elegance while providing scratch resistance.

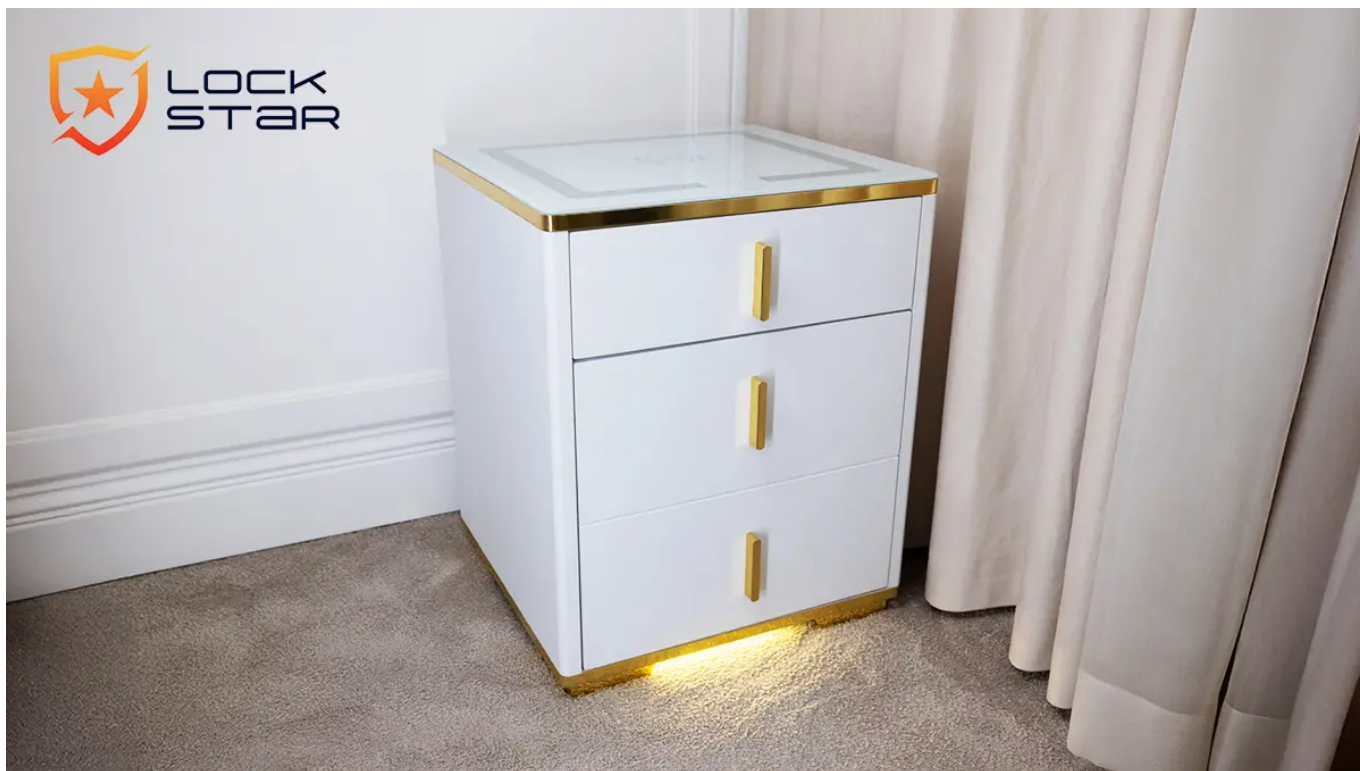

Hidden Steel Construction and Robustness

The safe is designed for maximum durability and protection. Its entire construction is made of **steel**, which guarantees resistance to damage and effective protection against burglary attempts. **The concealed design** provides an extra level of security, protecting the contents from unauthorized access. The steel construction ensures **the longevity of the safe**, making it a solid solution for storing valuables for many years.

High Security with Alarm and Multiple Methods of Opening

The Extralink Lock Star safe offers **advanced alarm systems** that activate in the event of an impact, violent damage or incorrect entry of a password or fingerprint. With these features, users can rest assured that their items are well protected. The safe also offers a variety of opening methods, including **fingerprint recognition**, password entry and key use, providing flexibility and convenient access depending on user preference.

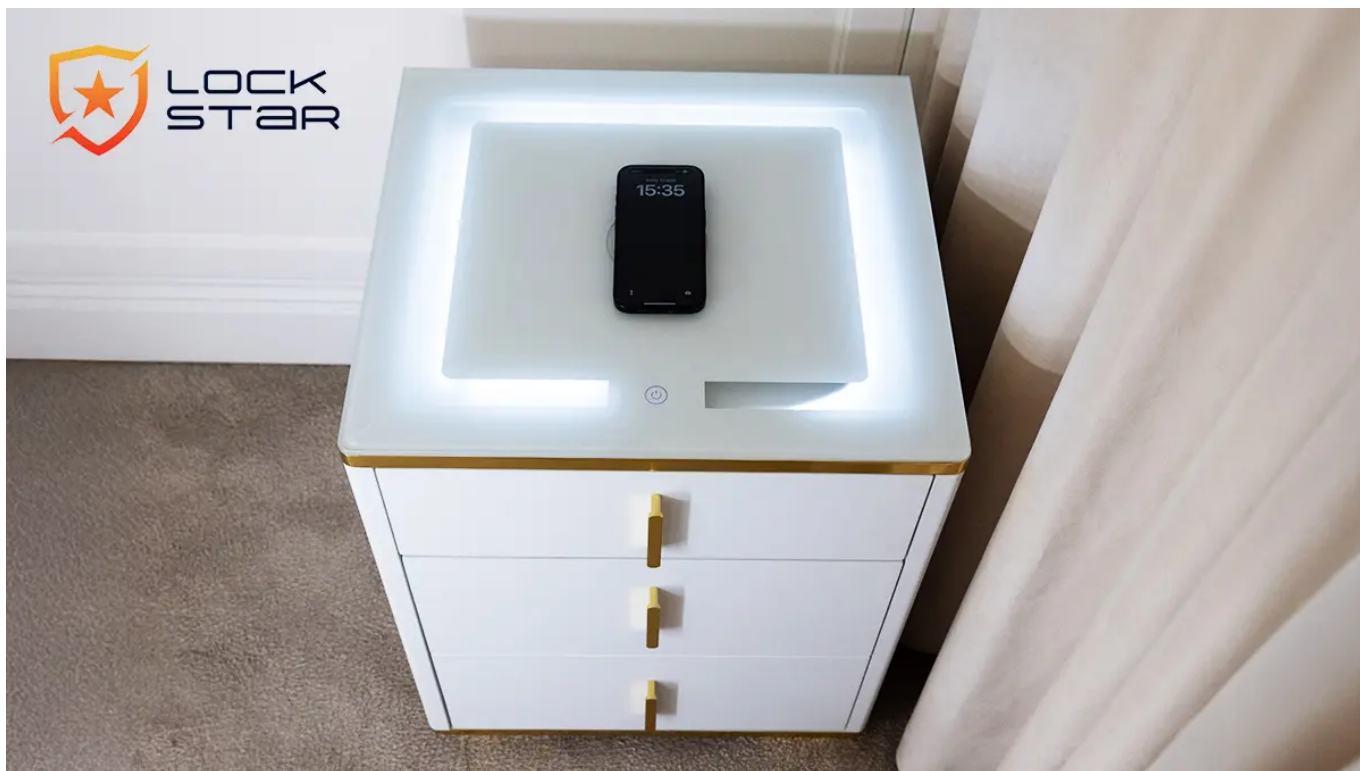

Storage and Accessories

The safe is equipped with a practical **top drawer** that allows you to store smaller items easily and conveniently. An internal **metal hook** and a **removable compartment** allow for additional space organization and flexibility in storing various items. In addition, a **lower metal foot** stabilizes the safe to prevent it from moving. Also included are **four keys**, an **external battery box**, **two expander screws** and an **instruction manual** for easy installation and convenience.

Dimensions and Spaciousness

The Extralink Lock Star safe measures **56x45x41 cm**, providing ample space to store valuables. It is ideal for a bedroom or office, where access to secured items must be both convenient and secure. Thanks to its sturdy construction and modern features, the safe provides protection, organization and comfort, making it an indispensable interior accessory.

Practical Features and Convenient Charging

The Extralink Lock Star is equipped with a **wireless inductive charging** system that allows convenient charging of mobile devices without the need for cables. Thanks to a tri-color backlight with adjustable touch sensitivity, the safe is easy to use even in low light. **The integrated acrylic panel** not only provides an aesthetically pleasing appearance, but is also scratch-resistant, extending its durability and functionality.
