Price: **399.90 zł** gross / 325.12 zł net

Manufacturer: EXTRALINK

Referention number: DNXGHJMPIRMMML

Information:

The Lock Star banknote counter with dual UV/MG verification ensures effective detection of counterfeit banknotes and greater transaction security. It operates at a speed of up to 800 banknotes per minute, saving time when counting cash. The clear LED display and intuitive panel make operation easy, while the compact, lightweight design (3 kg) allows the device to be carried conveniently. The equipment handles banknotes of different sizes and wear levels, minimising jams. It offers BAT and ADD modes, as well as half-note and chain-note detection, making it suitable for shops, SMEs, bureaux de change and offices.

Full product description

Double verification (UV/MG)

The built-in **ultraviolet (UV)** and **magnetic (MG)** verification technology provides a double layer of security. This system effectively detects counterfeit banknotes, informing the user of any irregularities during the counting process. It helps protect your business from financial losses and ensures that every cash transaction is **safe and transparent**.

Skutecznie wykrywa fałszywe banknoty

Bezpieczeństwo przy każdym liczeniu

Technologia
UV + MG

Speed and time savings

The counting machine offers impressive performance, reaching a speed of **up to 800 banknotes per minute**. This speed contributes to a significant reduction in the time needed to manually count large amounts of cash. It enables operators to focus on other key tasks instead of routine and time-consuming activities. Accurate counting mechanisms help maintain consistency in financial data.

Prędkość liczenia wynosi do 800 banknotów na minutę

Oszczędność czasu i dokładność

800
szt./min

Clear control panel

The ergonomic design of the counter includes an **LED display**, which provides **excellent visibility** of the counted amount and the currently selected operating mode. The data is easy to read even in poor lighting conditions, which helps avoid errors. Intuitively placed control buttons make it easy to switch between modes quickly.

Doskonała widoczność nawet w trudnych warunkach oświetleniowych

Compact and lightweight design

Thanks to its carefully considered dimensions of **230 x 245 x 145 mm** and a low weight of just **3 kg**, this device is highly portable and does not take up much desk space. Its lightweight construction makes it easy to move between workstations, which is important in dynamic environments. It supports standard **110-240 V AC** power supply.

Smooth banknote handling

The device is designed to process banknotes efficiently in various conditions – both those in circulation and those that are more worn. The feeding system accepts a wide range of sizes: **from 50 x 110 mm to 85 x 180 mm**, offering great flexibility. This design ensures **stable operation** and minimises jams, even when working with batches of mixed wear.

Płynna i stabilna obsługa

Pozwala na sprawne przetwarzanie zarówno nowych, jak i zużytych banknotów.
