Information:

Extralink LockStar MG X-600 is a modern banknote counter for fast, precise and secure cash counting. It supports most currencies worldwide, offers a clear LCD display, a folding handle for easy transport and various operating modes, including batch, total and batch+total. Advanced UV, MG, IR, DD and MT detection systems effectively detect counterfeit, double, half and taped banknotes. The device also enables mixed denomination counting, calculating the total value of banknotes of the same denomination, and operation at different speeds. Its stable construction, automatic start, stop and restart, and self-diagnostics ensure reliability in companies, cash desks and financial institutions.

Full product description

Money counter - precise detection and reliable operation

A modern banknote counter is an advanced device that ensures complete security and efficiency in cash handling. Thanks to the use of innovative methods for detecting counterfeit banknotes and an advanced design, it is ideal for businesses, cash desks and financial institutions.

Key features of the Extralink LockStar MG X-600 banknote counter

- **Foldable handle** – makes the device easier to store and transport.
- **Multi-currency support** – the counter is suitable for most currencies worldwide.
- **Counterfeit detection** – UV, MG, IR, DD and MT technologies allow for accurate detection of fakes.
- **Speed settings** – different operating speed modes are available.
- **Mixed denomination counting** – an optional function for convenient counting of different denominations.
- **LCD display**
- **Detection of half, double and chained banknotes** – a function for detecting damaged or linked banknotes.
- **Multiple counting modes** – the ability to count in batch, total and batch + total modes.

Precise counterfeit banknote detection

The counter is equipped with four integrated detection methods – **UV, IR, MG and DD**. These technologies guarantee reliable protection against counterfeit banknotes, ensuring that no fake passes through the system. Thanks to these features, your business is fully protected against financial losses.
