Manufacturer: EXTRALINK

Referention number: DNXGGOMJLRMMMP

Information:

Extralink MagSafe is a power bank with a capacity of 10000 mAh (38,5 Wh) and magnetic MagSafe mounting, which keeps a compatible smartphone securely in the correct position. It enables Qi wireless charging up to 15 W and fast charging via USB-C Power Delivery up to 20 W. An additional USB-A port with Quick Charge 3.0 increases versatility, and the included cable makes it easy to connect and charge the power bank itself. The LED indicator helps monitor the power level, while protection against overheating, overvoltage and overcharging, together with a flame-retardant ABS and PC housing, supports safe use.

Product features

Charging source	USB
USB Power Delivery (USB PD)	Yes
Charger compatibility	Universal
Built-in radio	No
Input interface	USB typ C
Battery technology	Lithium Polymer (LiPo)
Product colour	White
Built-in display	No
3G/4G USB modem compatibility	No
Type	02MW

Full product description

Energy always at hand

Extralink MagSafe offers a capacity of 10000 mAh, equivalent to 38.5 Wh of energy. This reserve helps top up the batteries of mobile devices during work, travel and everyday activities, while the white casing gives the device a bright, versatile look.

Stable MagSafe attachment

The magnetic MagSafe system keeps a compatible smartphone in the correct position. Simply place the device against the surface of the power bank to conveniently connect both elements without additional mounts.

Wireless charging

Qi technology enables wireless power transfer with up to 15 W. This solution reduces the need for a cable and makes it easier to power compatible phones at home, in the office or on the move.

USB-C power supply

The USB-C port with Power Delivery technology supports up to 20 W, allowing you to efficiently recharge smartphones and other compatible devices. The included cable makes it easy to connect equipment and recharge the battery.

Universal USB-A port

The USB-A port with Quick Charge 3.0 support lets you use many popular cables and accessories. This expands the power bank's range of uses to include devices requiring a traditional wired interface.

Control and protection

The LED indicator makes it easy to monitor the remaining power level. Protective circuits help guard against overheating, overvoltage and overcharging, while the casing made from a flame-retardant ABS and PC blend supports safe use.
