Manufacturer: EXTRALINK

Referention number: DNXGGOLLRMNGI

Information:

Extralink MagSafe is a powerbank with a capacity of 10000 mAh (38.5 Wh), providing convenient charging for devices at home, at work and on the move. The magnetic MagSafe mount securely holds a compatible smartphone, while Qi wireless charging offers up to 15 W. The USB-C port with Power Delivery up to 20 W and USB-A with Quick Charge 3.0 increase versatility and allow fast charging of various devices. The LED indicator makes it easy to monitor remaining power, and protection against overheating, overvoltage and overcharging ensures safe use.

Product features

Charging source	USB
USB Power Delivery (USB PD)	Yes
Charger compatibility	Universal
Built-in radio	No
Input interface	USB typ C
Battery technology	Lithium Polymer (LiPo)
Product colour	Graphite
Built-in display	No
3G/4G USB modem compatibility	No
Type	02MW

Full product description

Energy always at hand

Extralink MagSafe offers a capacity of 10000 mAh, equivalent to 38.5 Wh of energy. This reserve helps top up the batteries of mobile devices during work, travel and everyday activities, while the graphite casing gives the device a subdued look.

Stable MagSafe attachment

The magnetic MagSafe system keeps a compatible smartphone in the correct position. Simply place the device against the surface of the power bank to conveniently connect both elements without additional mounts.

Wireless charging

Qi technology enables wireless energy transfer with power of up to 15 W. This solution reduces the need to use a cable and makes it easier to power compatible phones at home, in the office or on the go.

Power via USB-C

The USB-C port with Power Delivery technology supports power of up to 20 W, allowing you to efficiently top up the energy in smartphones and other compatible devices. The included cable makes it easy to connect equipment and recharge the battery.

Universal USB-A port

The USB-A port with Quick Charge 3.0 support lets you use many popular cables and accessories. This expands the power bank's range of applications to devices requiring a traditional wired interface.

Control and protection

The LED indicator makes it easy to check the remaining power level. Protective circuits help guard against overheating, overvoltage and overcharging, while the casing made from a flame-retardant ABS and PC blend supports safe use.
