Full product description

Extralink MICHELE 16 CORE: white fibre optic box

Extralink MICHELE 16 i.e. lockable on circumferentially placed clamps and Allen screws **fibre optic drain** offers the possibility of connecting 16 fibers placed in a strong, durable outdoor housing.

Each box has integrated places for the cable fixings. The set includes cascade mounted weld trays for laying weld casings.

The bus cables (max. 4 pieces) are inserted through adjustable chokes. And the drop client cables are routed out through screwed-in crutches with gaskets to allow the repositioning of already finished cables with earned connectors.
