Full product description

Extralink Military Mountain Bike Hydration Backpack - your reliable companion on any route.

The Extralink Military Mountain Bike Hydration Backpack is the ideal solution for active people who value comfort, functionality and constant access to water during intense cycling or mountain biking expeditions. With a built-in 3-liter water reservoir and a lightweight but durable design, the backpack provides maximum comfort and freedom of movement, regardless of terrain conditions. Designed for people who need practical and reliable equipment for any expedition.

Wearing comfort and lightweight design

The backpack is made of lightweight 600D Oxford material, which makes it almost imperceptible on the back, which is crucial during long and demanding routes. **The back ventilation system** guarantees air circulation, which minimizes sweating and increases carrying comfort. **Adjustable suspenders** and **a chest strap** allow the backpack to perfectly fit your figure, ensuring load stability even during dynamic movements.

Hydration always at hand

One of the most important features of this backpack is the **3-liter water reservoir**, which allows you to hydrate your body without having to stop riding or walking. The drinking tube allows you to quickly and conveniently access water while on the move, which is especially practical during long workouts or grueling hikes. This allows you to focus on your activity, saving valuable time.
