Price: **1,490.00 zł** gross / 1,211.38 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGKNKGRMMHL

Product features

Storage relative humidity (H-H)	0 - 95%
Power source	mains electricity
Height	260 mm
LED indicators	Activity
Width	200 mm
Depth	180 mm
Storage temperature (T-T)	-40 to 85 °C
Rack mounting	No
Humidity measurement range	0 - 95%
Redundant fans support	Yes
Switching capacity	20 Gb/s
Networking standards	IEEE 802.3
Switch type	Managed
10G support	No
Loop protection	Yes
Active link detection	Yes
IFU / User manual	Yes
Operating temperature (T-T)	-20 to 65 °C
Quality of Service (QoS) support	Yes

Package type	Box
IGMP snooping	Yes
Web-based management	Yes
Fiber optic connector	LC
MAC address table	16384 entries
Power supply included	Yes
Power over Ethernet (PoE)	Yes
Installed SFP modules quantity	2
AC input voltage	100 V
Power over Ethernet (PoE) power per port	30 W
Gigabit Ethernet (copper) ports quantity	8
Cable types supported	Cat5e
DHCP features	DHCP client
Power over Ethernet (PoE) type supported	Active PoE
Product colour	White
Switch layer	L2+
MAC address filtering	Yes
Basic switching RJ-45 Ethernet ports type	Gigabit Ethernet (10/100/1000)
Watch case material	Metal
Basic switching RJ-45 Ethernet ports quantity	8
Stackable	No
Product weight	8000 g

Full product description

Extralink Minos - the ideal solution for an outdoor network

If you need a reliable and efficient network connection outdoors, the **Extralink Minos** Managed L2 Switch is the perfect choice for you. It includes **8 10/100/1000Mbps ports with PoE** (downlink) and **2 1000Mbps SFP** (uplink) **ports** to provide you with a stable and fast connection. Extralink Atlas is the ideal solution for monitoring buildings, roads, forests and extending network coverage. Get a stable and reliable network connection outdoors with Extralink Minos.

Key features of Extralink Minos:

Gigabit ports with PoE power supply

With 8 10/100/1000Mbps PoE-enabled ports and 2 1000Mbps SFP uplink ports, Extralink Minos provides a stable and fast network connection outdoors. The power of 2 ports of 90W and 6 ports of 30W each, as well as the maximum power of the entire device of up to 200W, make it possible to connect devices that require PoE power.

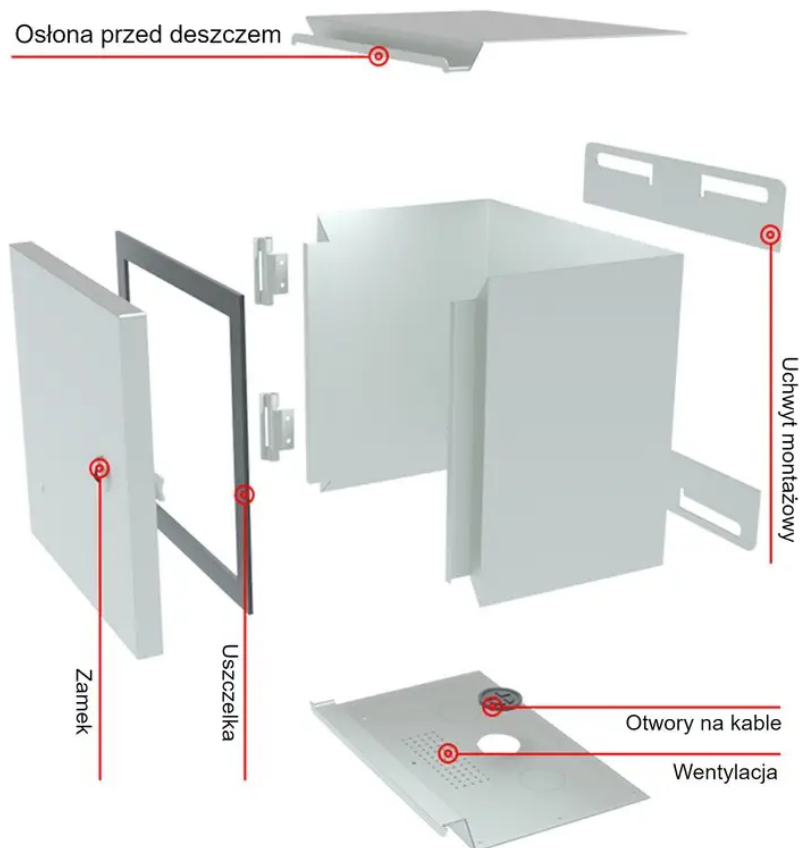

VLAN and PoE Auto-check

The VLAN mode provides port isolation from 1 to 8, allowing secure and stable communication only with uplink ports. The Extralink Atlas is also equipped with a PoE Auto-check function, which will check if connected devices are working properly and restart them if there is no response.

High level of surge and weather protection

The safety of your network is guaranteed by overvoltage protection of 6KV and ESD protection of 6KV (contact) and ESD 8KV (air). The device is also waterproof (IP55 rating) and protected against corrosion, so it can be used outdoors for a long time.

Ideal switch for outdoor deployments

Extralink Minos is the perfect solution for those who need a reliable and stable network connection outdoors, in the field or in other places where PoE-powered network connectivity is required. Extralink Minos allows you to easily and cost-effectively deploy network solutions in places where access to power and stable and fast network connectivity is required. It will be perfect for such deployments as monitoring of buildings, roads, forests, production halls, parks and for extending network coverage.
