Type	Angle bracket
Designation	Construction & maintenance

Full product description

Bracket for mounting the antenna on the balcony

The robust steel balcony holder is a good choice for people living in bunker houses or blocks of flats. The bracket allows for comfortable mounting of the antenna on the railing of the railing. The use of galvanized steel ensures **resistance to corrosion** and other damage.

How to mount the antenna mount on the balcony

The 600 mm high chuck with a diameter of 38 x 1.5 mm is mounted by means of a cyberbolt, so **there is no need to drill** holes. Installation of the antenna bracket is easy and quick, as well as possible change of its position.
