Coating	Zinc coating
Material	Stainless steel
Bracket height	600 mm
Number of holes	4
Product colour	Steel
Type	Bracket

Full product description

Mounting bracket for mounting the antenna on the roof

The robust steel bracket allows the antenna to be mounted on the roof. The use of galvanized steel guarantees **resistance to corrosion** and other damages.

Mounting the antenna on the roof

With a roof bracket with an overall height of **600 mm**, a base **120 x 120 x 2.5 mm** and a diameter of 38 x 1.5 mm you can easily install a satellite or terrestrial antenna on the roof of the building.
