Width	315 mm
Depth	100 mm
Suitable for outdoor use	Yes
Suitable for indoor use	Yes
Number of fibres supported (max)	16
Number of splice trays supported (max)	16
Mast mountable	Yes
Product colour	White
Watch case material	Acrylonitrile butadiene styrene (ABS)

Full product description

Extralink Pablo 16 CORE fiber optic box white

Extralink **Pablo 16 core** is the equipment used in the point of separation of the main fiber optic cable into client cables (in PON technology). Welds, splitter and other mounting accessories can be placed in the housing while maintaining protection and transparency of the network. In this version, the commutation field is abandoned in favour of a pocket splitter holder with integrated SC adapters.

Features:

- 16 fibres can be installed
- Removable connection tray for easy installation
- Many adaptor options are available
- It accepts, among other things, distribution cables and cables with pre-clips.
- Protection against bending radius
- Removable door for easy installation
- Can supplied with 16 heat shrink welds and other components

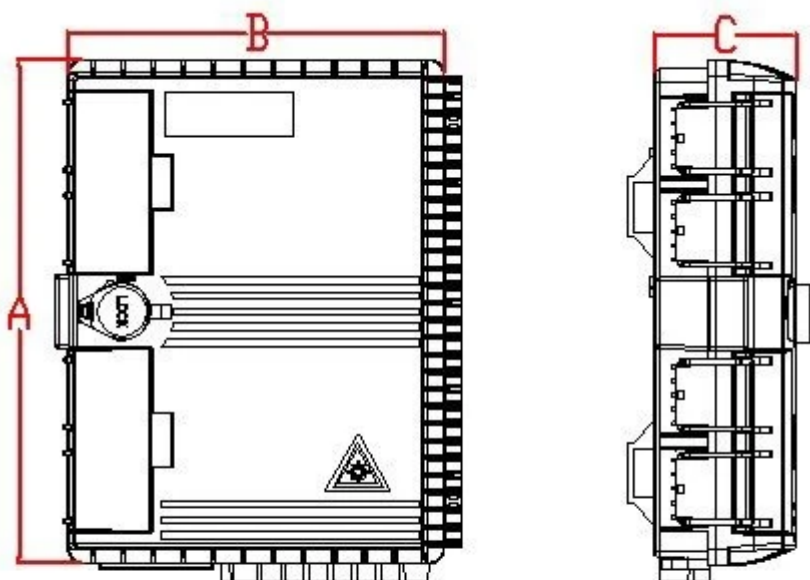

Application:

- Data centres, premises installations, telecommunications networks
- Ethernet, fiber channel, ATM, LAN, MAN and WAN
- ICT and telecommunications networks
- Wall/post mounting
- Internal and external use

Dimensions:

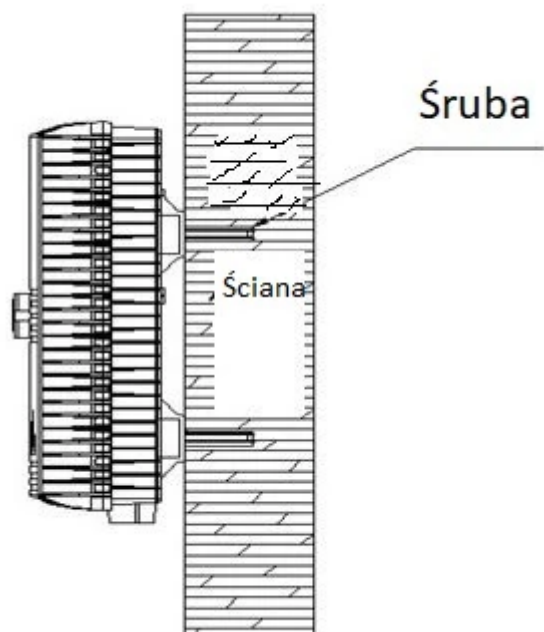

A – 315 mm

B – 235 mm

C – 100 mm
