### Full product description

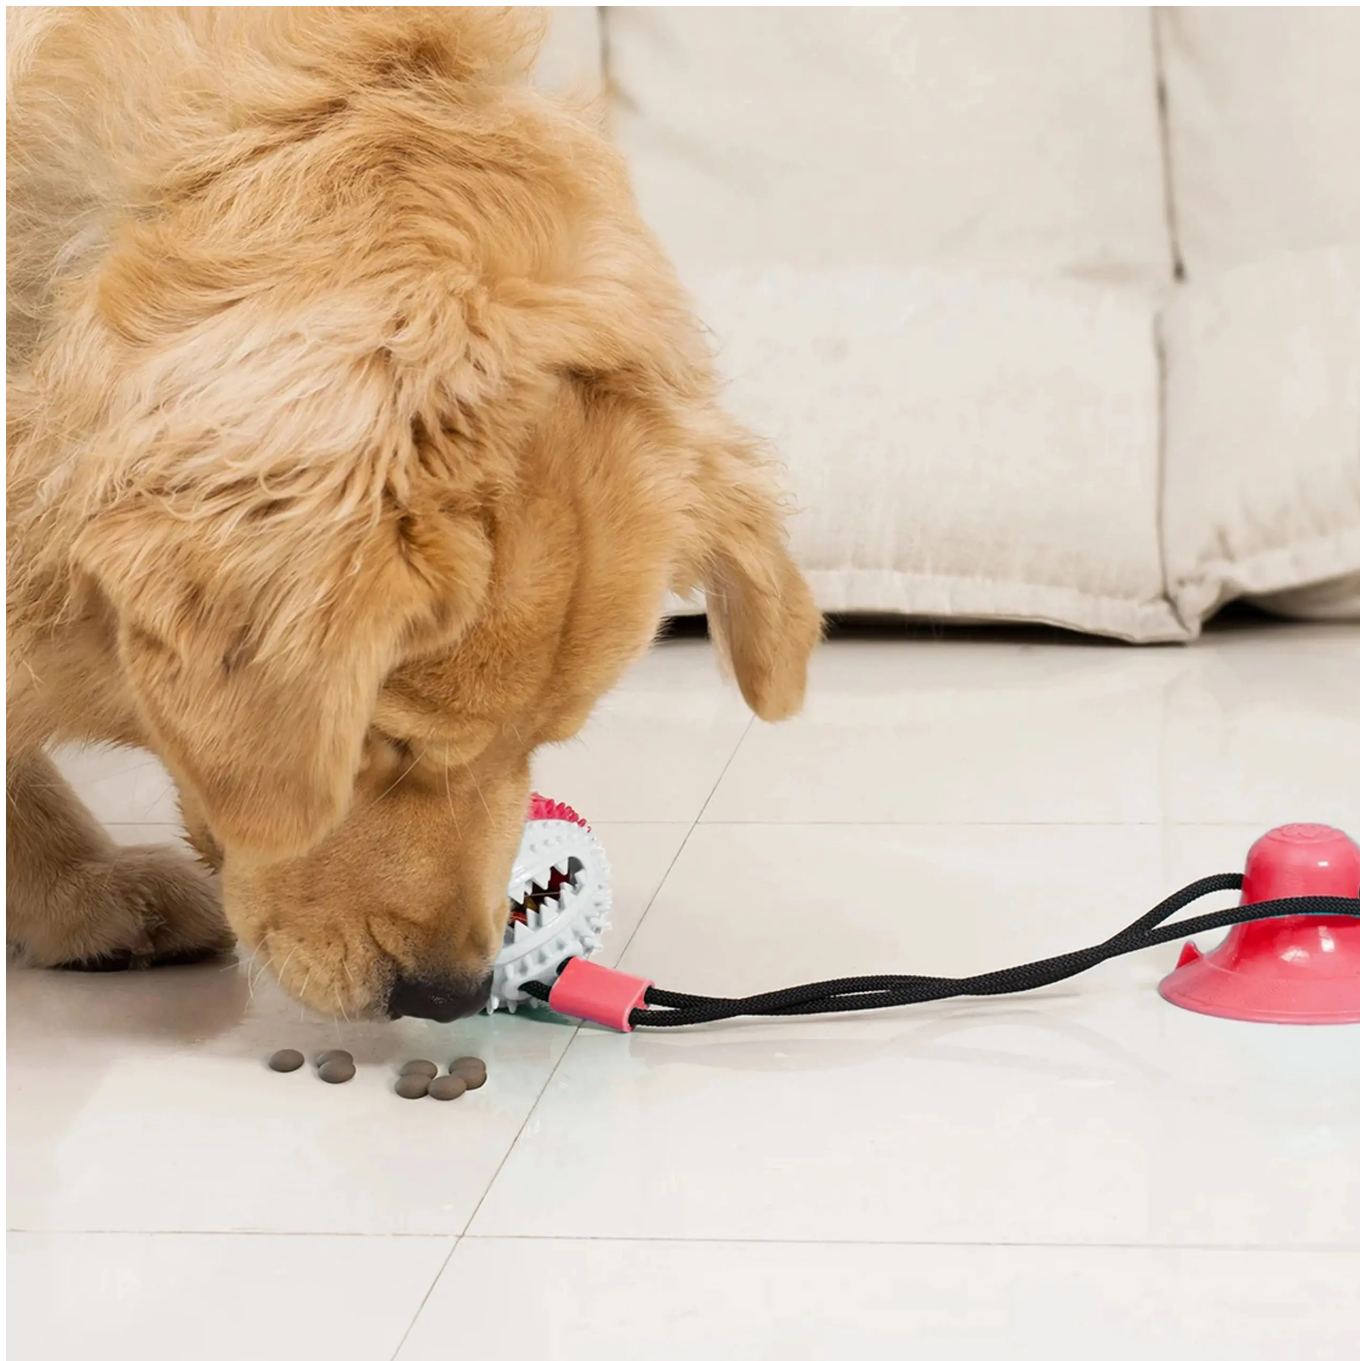

### A modern toy that will keep your dog healthy and entertained

**The Extralink Pets - Treat and food hiding toy with suction** cup is an excellent tool that simultaneously entertains and cares for your pet's oral health. The treat-hiding chew allows for hours of fun while forcing your dog to think and search for treats, effectively stimulating his mind. It's ideal for active dogs who like a challenge and need stimulation.

## Fun that develops the mind

**Hiding treats in a toy** is an excellent way to provide your dog with both entertainment and intellectual development. Your dog has to put some effort into extracting the treats, which not only keeps him occupied, but also exercises his logical thinking skills. In this way, your pet avoids boredom and gets an occupation that is beneficial to his well-being and mental development.

### **Stability and convenience of use**

**The strong suction** cup used in the toy allows it to be **firmly attached to a smooth surface**, so your dog can tug, bite and play without the risk of moving the toy all over the room. This is a great solution, especially when your hands are busy and your pet needs a moment of entertainment. The stability of the toy also ensures greater safety during intense chewing sessions.

### **Solid workmanship and safety**

**Made of durable and safe materials**, the toy is resistant to strong biting and pulling, making it suitable even for dogs with stronger jaws. **The sturdy cord and durable ball** guarantee that the toy will serve your pet for a long time. An additional bell inside the ball increases the attractiveness of the toy, encouraging your dog to continue playing and searching for hidden treats.
