Price: **612.00 zł** gross / 497.56 zł net

Manufacturer: EXTRALINK

Referention number: DNXGFPHMERMLPM

Product features

Rod length	50 m
Rod diameter	8 mm
Product colour	Blue

Full product description

Fiberglass pilot for pulling cables with a diameter of 8 mm and a length of 50 meters

Pilot made of fiberglass used for pulling cables with **diameter of 8 mm** and **length of 50 meters**.

It is placed on a stand which makes it easy to unroll. The fiber is covered with yellow plastic that protects and provides better slip of the cable. Fiber of high strength, resilience and resistance to breaking and bending.

The frame, on which the fiber is wound, **has a brake and an eyelet** that makes it easier to guide the fiber. The construction of the frame makes it easy to carry the fiber and to use it. At the end of the filament there is a guiding head.

Extralink Pilot

8mm 50m

professional FRP fibreglass
cable pulling pilot, mounted
on a stable stand.

Application

- **Pulling cables** between telecom manholes
- **Pushing cables** under roads
- **Installations** in suspended ceilings
- **Cleaning, clearing** pipes, culverts, sewers
- **Insertion of cables** into protective pipes

**The rack's clever design
makes it easy to transport
and store the unit**

Robust and flexible FRP glass fibre

resistant to bending and fracture, covered with protective PE plastic

**Sturdy,
powder-coated
stand with manual
brake to prevent
accidental unfolding**

Flexible and extremely flexible FRP glass fibre

ideal for harsh environments

The ideal tool for pulling cables in electrical, fibre optic and telecommunications installations
