Manufacturer: EXTRALINK

Referention number: DNXGGKJLMRMMKP

Product features

Rod length	75 m
Rod diameter	8 mm

Full product description

Fiberglass pilot for pulling cables with a diameter of 8 mm and a length of 75 meters

Pilot made of fiberglass used for pulling cables with a **diameter of 8 mm** and a **length of 75 meters**.

It was placed on a stand that will make it easy to unroll. The fiber is covered with yellow plastic, which protects and provides better cable slippage. The fiber has high strength, resilience and resistance to breakage or bending.

The rack on which the fiber is wound **has a brake and an eyelet** to help guide the fiber. The design of the rack makes it easy to carry the fiber and use it. At the end of the fiber is a guide head.

Extralink Pilot

8mm 75m

professional FRP fibreglass
cable pulling pilot, mounted
on a stable stand.

Application

- **Pulling cables** between telecom manholes
- **Pushing cables** under roads
- **Installations** in suspended ceilings
- **Cleaning, clearing** pipes, culverts, sewers
- **Insertion of cables** into protective pipes

**The rack's clever design
makes it easy to transport
and store the unit**

Robust and flexible FRP glass fibre

resistant to bending and fracture, covered with protective PE plastic

**Sturdy,
powder-coated
stand with manual
brake to prevent
accidental unfolding**

Flexible and extremely flexible FRP glass fibre

ideal for harsh environments

The ideal tool for pulling cables in electrical, fibre optic and telecommunications installations
