

**Extralink Piorun
1200VA/1000W Volt Sinus Pro
replacement | Power inverter
| pure sine wave, battery
voltage 24V DC**

Price: **599.03 zł** gross / 487.02 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGKJPJRMMLK

Product features

Height	120 mm
Input voltage	12 V
Output voltage	220 V
Width	290 mm
Depth	255 mm
Suitable for outdoor use	No
Cables included	AC
Power supply type	Auto
Built-in blower fan	Yes
Cooling type	Active
Input frequency	45 Hz
Suitable for indoor use	Yes
Display type	LCD
Output power	1000 W
Product colour	Black
Power current type	DC-to-AC
Output frequency	50 Hz
Built-in display	Yes
Watch case material	Acrylonitrile butadiene styrene (ABS)

Designation	Universal
Product weight	9190 g

Full product description

Extralink Lightning 1200VA 1000W pure sine wave inverter

Introducing the powerful **Extralink Lightning inverter with pure sine wave**, designed to meet all your power supply needs. Our inverter features a fast switching time, ensuring a seamless transition from mains to battery power in the event of a power outage. In addition, the **Extralink Lightning is designed with multiple layers of protection**, including overload, overvoltage, short circuit and over-temperature protection, ensuring safe and reliable operation. The Extralink inverter combined with [Extralink batteries](#) (sold separately) [will create a reliable UPS backup power system](#).

MULTIPURPOSE – RELIABLE POWER SUPPLY IN ANY SITUATION

**Heating
and pumps**

**IT networks and
network infrastructure**

Medical devices

**Security systems
and emergency lighting**

**One UPS device – many applications: heating, IT,
medicine, security systems**

Key features of Extralink Lightning 1200VA/1000W

- Very wide range of input voltage from mains
- Stable output voltage (pure sine wave output), can be used for all electrical appliances
- LCD display with lots of information
- CPU control

- Short switching time, high efficiency
- Intelligent battery management to extend battery life
- Protection against overload, short circuit, over temperature

UPS

Emergency power supply in case of power failure

Inverter

Converts DC from battery to 230V AC

Charger

Automatic charging of 24V battery

AVR

Automatic voltage regulation for stable power supply

Pure sinusoidal waveform

One of the key features of our inverter is its **ability to produce a pure sine wave output**. This means that the alternating current produced by the inverter has the same quality and stability as the current supplied by the power grid. Pure sine **wave** is essential for powering sensitive electronic devices such as laptops, refrigerators, televisions and the most sensitive ones namely furnaces, CO pumps and medical equipment, which can be easily damaged by inconsistent or unstable power supply. With the pure sine wave output of our inverter, you can be sure that your electronic devices will run smoothly and efficiently, without risk of damage.

	LIGHTNING BOLT	UPS offline
		
Operating time	Scalable – battery dependent	Usually 5–15 min
Battery	External 24V (gel/AGM)	Built-in, small
Powered devices	Furnaces, servers, medical equipment	Computers, routers
Inverter	✓	✗
Charger	✓	✗
AVR	✓	Sometimes
Battery interchangeability	✓	✗

UPS emergency power supply in combination with Extralink batteries

[Together with Extralink brand 24V batteries](#) (sold separately), the inverter functions as a UPS. UPS mode provides uninterrupted power in case of a power outage. When mains power is available, the inverter charges the batteries and ensures that they are always ready to provide emergency power. When mains power is interrupted, the inverter automatically switches to battery power, ensuring a quick switchover and uninterrupted power supply. UPS mode is ideal for powering critical equipment such as servers, routers and security systems that require uninterrupted power to operate efficiently. With our inverter's UPS mode and Extralink's 24V batteries, you can enjoy peace of mind knowing that your critical equipment will always be powered, even during extended power outages.

Automatic emergency power supply for heating systems. Protection during power outages.

Compatible with 24V batteries (AGM, Gel, LiFePO4).
Power: 1000 W (24 V – 230 V, pure sine wave)

Clear LCD display

Our Extralink Lightning inverter features **an easy-to-read LCD display** that allows you to instantly monitor the inverter's performance and status. The LCD display shows real-time key information such as input voltage, output voltage, battery charge level and load level. With this information at your disposal, you can easily monitor the inverter's performance and ensure optimal operation. In addition, the **LCD display is backlit**, making it easy to read even in low-light conditions.

Real-time LCD display – input/output voltage, battery level and load at a glance.

Ideal for furnaces, servers and sensitive devices – reliable 24V UPS with pure sine wave.

Multi-level protection for reliable operation

Layers of protection ensure safe and reliable operation of the inverter and connected devices, which are protected from potential damage or failure.

- **Overload protection**, which protects against excessive current consumption
- **Over-voltage** protection, to protect against high input voltage
- **Undervoltage** protection, to protect against low input voltage
- **Short-circuit protection**, to prevent damage in the event of a short circuit
- **Over-temperature** protection, to protect against overheating

Pure sine wave, safe for sensitive devices

8.26kg

Ideal for furnaces, servers, medical devices,
and emergency systems.
