Full product description

Extralink 12 V PoE power supply

The Extralink 12-volt PoE power supply delivers power to network devices, such as APs and cameras, through selected strands of twisted-pair cable. This solution allows network data to be transmitted while providing power through a single cable.

PoE power supply Plug for electrical outlet 12V 12W 1A

LED indicator

2 Ethernet LAN ports
(Rj-45)

PoE suport

Compact size

The power supply with two RJ45 ports has a form of over-the-air socket. To one is connected the device to be powered, and the other socket is used to connect via patchcord a switch or router.

EXTRALINK

PoE power supply 12V 1A

The Extralink PoE power supply 12V supplies electricity to network devices such as APs and cameras via selected strands of the twisted-pair cable. This makes it possible to transmit network data while supplying power over a single cable.

PoE power supplies are widely used in various areas where there is a need to power network devices without the need for separate power supplies.

VoIP telephones

These can be easily installed in offices or other locations without the need for a separate power supply.

Network equipment

Other network devices such as switches, routers and similar devices can also be powered by PoE.

Wireless access points

Facilitates the installation and deployment of devices to ensure better wireless coverage.

External installations

In the case of outdoor installations, such as outdoor surveillance and signalling systems, PoE power supplies allow for easy installation without the need for complex power supply solutions.

IP cameras

Allows cameras to be easily installed in a variety of locations, even where power sockets are not available

Intelligent lighting and building management systems

Some lighting and building management systems can be powered by PoE, which simplifies energy management and enables easy installation.
