Full product description

Extralink 24 V 12 W PoE power supply.

The Extralink PoE power adapter (power adapter) supplies electricity through selected strands of twisted-pair cable to network devices such as media converters, access points, cameras, etc.

24V 12W PoE power supply

2 Ethernet LAN ports
(RJ-45)

PoE suport

LED indicator

Power cable
included

Compact size

The power supply is equipped with a 1.2-meter long power cable terminated with a cloverleaf connector and two RJ45 ports, one is used to connect the device to be powered, and the other socket is used to connect a patchcord to a switch or router. The device can be installed in residential, tele-technical rooms or rack cabinets.

EXTRALINK

12W PoE power supply

The Extralink PoE power supply (power adapter) supplies electrical energy via selected strands of the twisted-pair cable to network devices such as media converters, access points, cameras, etc.

The LED indicates the correct operation of the device. In the event of a short-circuit or overload protection tripping, the PoE power supply cuts the voltage to the device, and restores the voltage automatically after the failure is over.

PoE power supplies are widely used in various areas where there is a need to power network devices without the need for separate power supplies.

VoIP telephones

These can be easily installed in offices or other locations without the need for a separate power supply.

Network equipment

Other network devices such as switches, routers and similar devices can also be powered by PoE.

Wireless access points

Facilitates the installation and deployment of devices to ensure better wireless coverage.

External installations

In the case of outdoor installations, such as outdoor surveillance and signalling systems, PoE power supplies allow for easy installation without the need for complex power supply solutions.

IP cameras

Allows cameras to be easily installed in a variety of locations, even where power sockets are not available

Intelligent lighting and building management systems

Some lighting and building management systems can be powered by PoE, which simplifies energy management and enables easy installation.

A wide range of PoE power supply applications

PoE power supplies are versatile and used in a variety of environments, whether in commercial buildings, offices or industrial applications. They allow network devices to be powered without the need for separate power cables, simplifying the installation and management of the network infrastructure.
