Full product description

Extralink 24 V PoE power supply

The power supply delivers electricity through selected strands of twisted-pair cable to network devices such as APs, cameras, etc. This solution allows network data to be transmitted while providing power.

PoE power supply Plug for electrical outlet 24V 12W 0.5A

LED indicator

2 Ethernet LAN ports
(Rj-45)

PoE suport

Compact size

The plug-in power supply is equipped with two RJ45 ports, one is used to connect the device to be powered, and the other socket is used to connect a patchcord to a switch or router.

EXTRA LINK

PoE 24V 0.5A power supply

This power supply provides electrical power via selected strands of the twisted-pair cable to network devices such as APs, cameras, etc., allowing network data to be transmitted while providing power. This enables network data to be transmitted while also providing power.

PoE power supplies are widely used in various areas where there is a need to power network devices without the need for separate power supplies.

VoIP telephones

These can be easily installed in offices or other locations without the need for a separate power supply.

Network equipment

Other network devices such as switches, routers and similar devices can also be powered by PoE.

Wireless access points

Facilitates the installation and deployment of devices to ensure better wireless coverage.

External installations

In the case of outdoor installations, such as outdoor surveillance and signalling systems, PoE power supplies allow for easy installation without the need for complex power supply solutions.

IP cameras

Allows cameras to be easily installed in a variety of locations, even where power sockets are not available

Intelligent lighting and building management systems

Some lighting and building management systems can be powered by PoE, which simplifies energy management and enables easy installation.
