Manufacturer: EXTRALINK

Referention number: DNXGHHPKRMMLI

Information:

Extralink Smart Life Sandwich Maker SJ-22 is a compact sandwich maker with 750 W power that heats up quickly and toasts sandwiches evenly, ensuring crispy bread on the outside and a warm filling. The non-stick coated plates make it easy to remove sandwiches and clean the appliance, while the shaped surfaces divide them into practical triangles. The insulated handle, operating indicator lights and non-slip feet increase convenience and safety. The option of vertical storage saves space in the kitchen.

Full product description

Easy-to-clean coating

The heating plates of the sandwich maker are coated with a **non-stick coating**, which makes it easier to remove sandwiches and clean away food residue. Once the appliance has cooled down and been disconnected from the power supply, the surface can be wiped with a soft, damp cloth.

Warm and crispy sandwiches

Extralink Smart Life Sandwich Maker SJ-22 lets you prepare warm, evenly toasted sandwiches for breakfast or a quick snack. The **750 W** power supports efficient heating of the appliance, and the indicator lights on the housing make it easy to use.

Insulated handle and indicator lights

The **insulated handle** makes it easy to open and close the sandwich maker, limiting contact with the heating elements. The indicator lights show when the appliance is operating and when the correct temperature has been reached, while the non-slip feet help maintain stability during use.

Even toasting

The **750 W** power allows the plates to heat up quickly, and the even heat distribution helps achieve bread that is crispy on the outside and warm on the inside. The shaped surfaces divide each sandwich into triangular portions, making it easier to serve afterwards.

Compact storage

The sandwich maker's design allows it to be **stored upright**, helping save space in a cupboard or on the kitchen worktop. Its compact dimensions make it easy to put away after preparing sandwiches.
