### Full product description

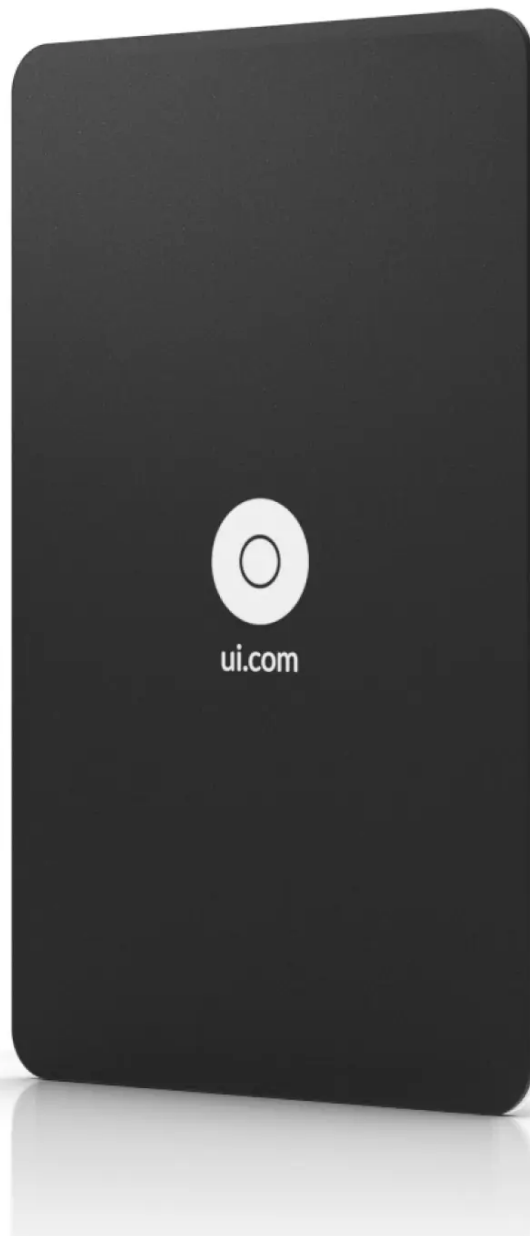

### Secure and convenient access to the UniFi Access system

**Ubiquiti UA-Card-B-10** is a **set of 10 NFC smart cards** that work with UniFi Access. With advanced encryption and **MIFARE DESFire** support, the access cards **enhance security and eliminate the risk of unauthorized entry.**

## Security and AES-128 encryption

**Ubiquiti UA-Card-B-10 access cards** use an advanced AES-128 encryption mechanism, which protects them from copying and tampering. User data is **encrypted at both the transmission and storage levels**, further **enhancing protection** against unauthorized access. With this mechanism, the card number is protected from leakage.

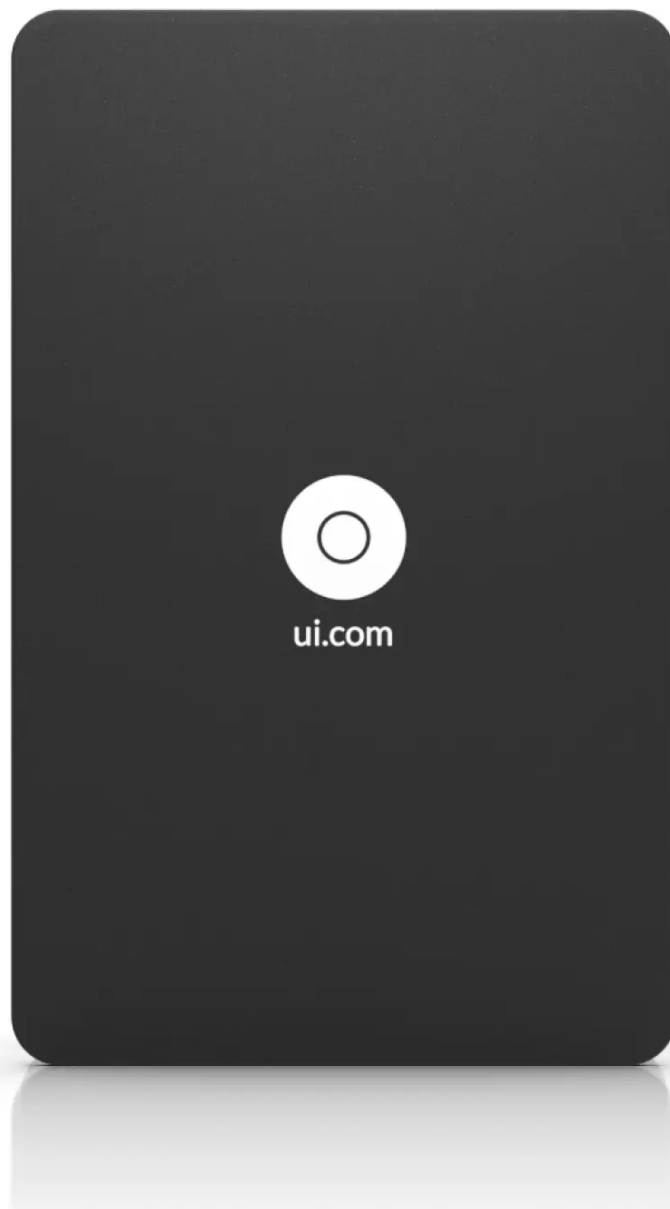

### **NFC support for convenience of use**

Each **access card** works with **13.56 MHz NFC** technology, which enables fast and contactless login to the **UniFi Access** system. Users can log into their zones without having to enter codes or use physical keys, significantly **speeding up the process of entering a building**.

## Compatibility with UniFi Access

**UA-Cards** are fully compatible with UniFi Access, which means seamless integration with Ubiquiti readers. Thanks to **UniFi Access' unique security protocol**, only authorized devices on the network can accept the cards, **increasing the level of control and protection.**

### **Lightweight and durable design**

**The access card** is made in accordance with the **ISO 7810 ID-1** format, which means it has a standard ID card size. With **a thickness of 0.84 mm** and **a weight of 5 g**, the cards are convenient for everyday use and fit into most cases and card systems.
