Full product description

Ubiquiti NFC Access Cards for UniFi Access System

The Ubiquiti UA-Card-W-10 kit is a practical solution for businesses, offices and facilities requiring access control. The cards work with the **UniFi Access** system, offering convenience of use and a high level of security. Thanks to **NFC** (Near-Field Communication) technology and encryption protocols, the cards provide fast and secure access to premises.

Convenience Cards for Daily Access

UA-Card-W-10 cards work with **MIFARE DESFire EV3** technology, providing a high level of security for unlocking doors. The cards are lightweight and have **an ISO 7810 ID-1** format, which means they fit into any wallet or business case. Operated through a UniFi Access **reader**, the user gets into rooms quickly and without unnecessary steps.

Security at the UniFi Access System Level

The UA-Card-W-10 card set operates on **UniFi Access proprietary security protocol**, which increases protection against cloning attempts. Communication at **13.56 MHz** guarantees stable and reliable reading. The combination of NFC technology and Ubiquiti Networks standards provides the high level of control expected from corporate access systems.
