Full product description

Ubiquiti UACC-Intercom-WM - UA-Intercom intercom mount.

The **Ubiquiti UACC-Intercom-WM** is a **Wedge Mount** that provides a **20° tilt angle** for a better camera view and improved video recording. With its robust design and **UA-Intercom** compatibility, this product simplifies installation and provides greater visibility range for your communication system.

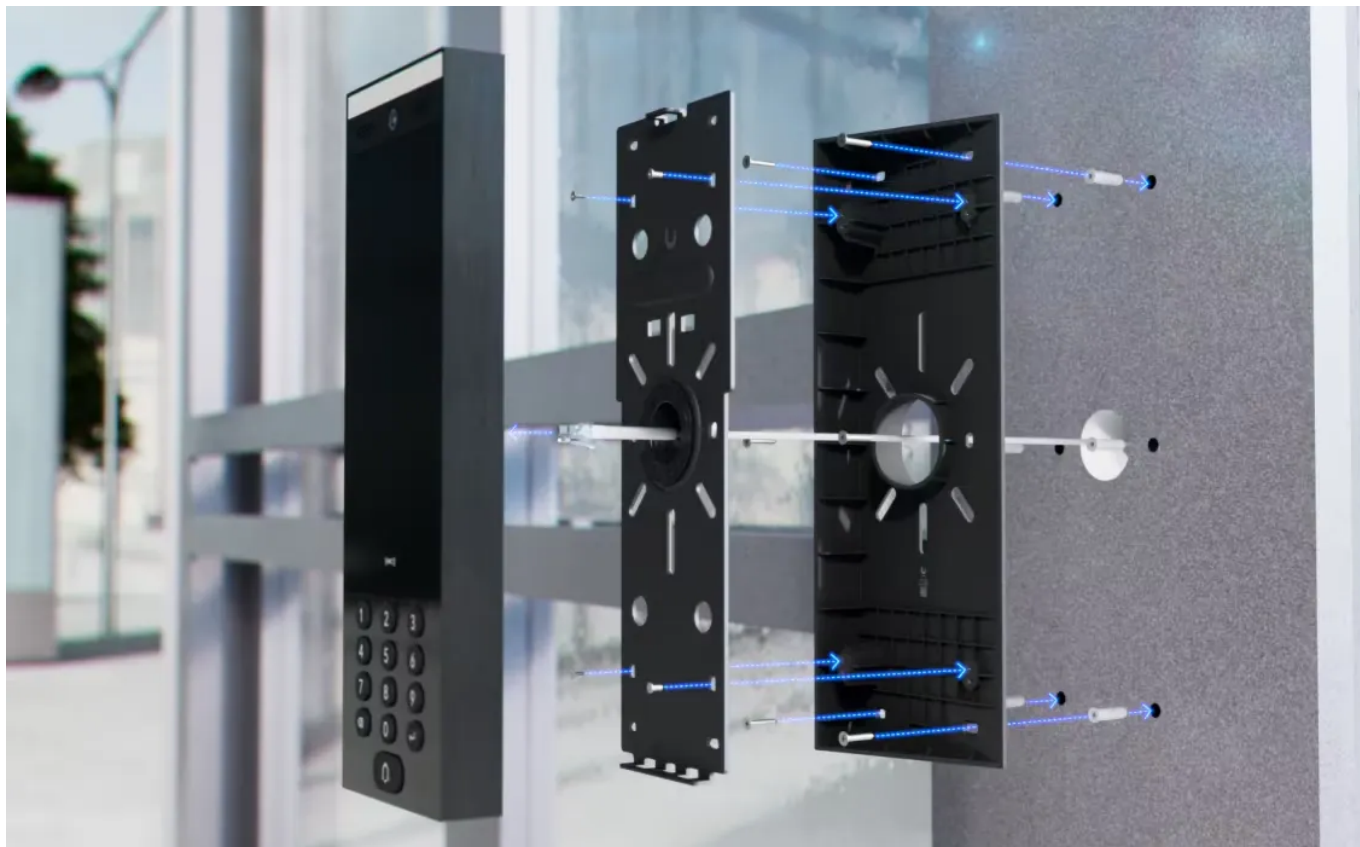

Better viewing angle for intercom camera

With a **20° angle**, the mount allows a better view of the area in front of the door, improving video recording and enhancing the effectiveness of monitoring. The product is ideal for places where the standard intercom setting does not provide an optimal viewing angle. With this feature, the user is assured that **the camera will capture more details**, improving security and access control

Simple installation and wide compatibility

The kit fits **UA-Intercom**, allowing easy installation on both the wall and **gooseneck arm**. Thanks to solid materials - **polycarbonate and brass** - the mount is durable and weatherproof. The product includes all the necessary mounting components, allowing you to quickly and conveniently attach the device.

Stable communication and monitoring service

With the improved angle, the intercom camera **increases the monitoring range**, which is crucial in access control systems. **The mount** does not affect microphone functionality and **audio handling**, so communication remains clear and smooth. Users can rely on full control of the intercom system without the need for additional settings.

Durable construction and modern materials

The mount is made of polycarbonate and brass, which ensures its high resistance to mechanical damage and weather conditions. This makes the product **suitable for both residential and commercial buildings**.
