Full product description

Breakthrough vacuum cleaner for carpets, couches, upholstery, car

We know that getting rid of stains can be a constant struggle. Stubborn stains are difficult to remove, and fighting them by hand is even more difficult. Carrying carpets and blankets to the laundromat or washing them outside is a necessity no one feels like doing. UWANT B100-S, a breakthrough stain cleaning system that fights stains in ways other stain cleaners can't.

High suction power and quiet operation

The vacuum cleaner for cleaning carpets, couches, upholstery, and the car has an impressive suction power of up to 12,000 Pa, which makes it possible to effectively remove hard-to-remove items like pet hair, jelly and eggs. Operating at a noise level of 70 dB in standard mode, it is quiet enough that cleaning is possible even when your children are asleep.

Auto-cleaning brush maintains hygiene

Pressing one button activates the self-cleaning function of the brush and pet hair collection tool. The device is easy to use and does not require drying after use. The included handle allows for convenient storage of the long hose. The UWANT B100-S is suitable for cleaning a variety of materials, including couches, carpets and curtains.

Practical storage solutions and large water tank

The power cord easily retracts with a simple switch. The device is equipped with an innovative Vientiane wheel for easy handling and cleaning. The fresh water tank has a capacity of 1,800 ml, and the used water tank has a capacity of 1,600 ml, allowing for repeated use without refilling.

Effective removal of animal stains

The device effectively deals with stains left by pets, such as dogs or cats coming home. A special fabric cleaning tool collects hair, dust and removes pet hair from upholstered furniture and carpets.
