Information:

The Xiaomi Smart Double Stack Air Fryer 12L is a spacious oil-free air fryer with two independent baskets and a vertical design, allowing you to prepare up to four dishes at once while saving worktop space. Its 2800 W power and 360° hot air circulation deliver crispy, juicy results with minimal oil. A temperature range of 40-230°C, 14 automatic programmes and intelligent synchronisation make it easy to cook different dishes at the same time. The colour HD display, easy cleaning, dishwasher-safe parts and control via the Xiaomi Home app with over 100 recipes, 24 h scheduling and a keep-warm function add everyday convenience.

Product features

Product type	Hot air fryer
Handle(s)	Yes
Adjustable thermostat	Yes
IFU / User manual	Yes
Package depth	457 mm
Number of programs	14
Package height	520 mm
Package width	335 mm
Easy to clean	Yes
Temperature (min)	40 °C
Frying function	Yes
Display type	OLED
Control type	Rotary
AC input frequency	50 Hz
AC input voltage	220 V

Temperature (max)	230 °C
Product colour	Black
Construction type	Double
Power	2800 W
Appliance placement	Stand-alone
Built-in display	Yes
Product weight	10000 g

Full product description

Crispy dishes for the family

Xiaomi Smart Double Stack Air Fryer 12L is a device that turns everyday cooking into a quick and simple process. Thanks to its unique **stacked design**, the appliance allows you to prepare up to **four dishes at once**, while saving valuable space on the kitchen worktop. The high **2800W** power and **360° hot air circulation** system ensure that dishes are juicy on the inside and exceptionally crispy on the outside, with minimal oil use.

Key advantages of the device

- **12-litre capacity** divided into two baskets allows you to roast a whole chicken or large portions of chips.
- **Space saving** of around 35% thanks to the vertical arrangement of the heating chambers.
- **Wide temperature range** from 40°C to 230°C allows dough to rise, fruit to be dried and steaks to be grilled.
- **14 automatic modes** make it easy to select the right settings for specific ingredients without unnecessary guesswork.
- **Intelligent synchronisation** ensures that dishes from both baskets are ready to serve at the same time.

Two baskets, more options

The use of **dual baskets** with a total capacity of 12 litres means that preparing dinner for a large family is no longer a challenge. The upper and lower chambers work independently, allowing you to cook **chips, meat or vegetables** at the same time. Thanks to the included grills, two layers of food can be placed in each section, giving a total of four cooking levels. This solution significantly reduces the time spent in the kitchen and lets you enjoy a shared meal without waiting for the next batch of food.

Intelligent synchronisation

The **One-touch synchronisation** function solves the problem of different cooking times for various foods. If one dish requires a longer cooking time than another, the device will automatically adjust the start of both processes so that they **finish at the same time**. In addition, the **Double-basket capacity** mode allows you to quickly copy settings for both chambers, which helps when preparing a large quantity of the same snack for guests. Intuitive operation with the SYNC button makes managing meals exceptionally easy.

Precise heat control

The device offers an impressive temperature range from **40°C to 230°C**. Low temperatures support **dough fermentation** for yeast dough and the preparation of healthy dried fruit snacks. By contrast, the high temperature of 230°C helps to quickly seal the pores in meat, which is key to achieving the perfect steak. The **360° hot airflow** system ensures that hot air reaches every corner, eliminating the need for large amounts of oil and supporting healthy eating habits at home.

Wyrastanie ciasta w temperaturze 40°C

Suszone owoce 60°C

Ciasto 150°C

Tartaletki jajeczne 180°C

Frytki 200°C

Stek 230°C

HD colour display

The interactive **high-resolution LCD screen** is the command centre of your kitchen. The display clearly shows the operating status of both baskets, the current temperature and the time remaining until the programme ends. Thanks to the **14 built-in modes**, such as pizza, fish or chicken drumsticks, one touch is all it takes for the device to select the optimal settings automatically. Clear icons and vivid colours make it possible to monitor progress even from the other end of the room, increasing ease of use.

Easy to keep clean

The interior of the device, made of **metal**, is resistant to corrosion and high temperatures, making it easier to remove greasy residue. The baskets have been coated with a special **non-stick coating** that prevents food residue from sticking. Importantly, the removable parts and accessories can be safely **washed in the dishwasher**, saving time after the meal. An additional **drying mode** helps remove moisture from the interior after washing, preventing bacteria growth and ensuring the air fryer is always ready for the next use.

App and smart features

Connection to the **Xiaomi Home app** opens access to a database of over **100 online recipes** that guide the user step by step through the cooking process. The device also offers **24-hour scheduling**, so you can programme the start of cooking so that a hot meal is waiting for you when you return from work. The **Keep Warm** function automatically keeps the dish at temperature for 30 minutes, while sound and light notifications remind you to turn the food for the best crispiness.

Specification

Product name	Xiaomi Smart Double Stack Air Fryer 12L
Rated capacity	12 L
Product model	MAF-DS1201
Rated frequency	50-60 Hz
Net product weight	10 kg
