Information:

Paper and cartridges for Xiaomi Portable Photo Printer Pro enable the printing of sharp, detail-rich photos with vivid colours and a durable finish. Dye-sublimation technology and automatic lamination protect prints from moisture and fading, so they retain the look of freshly printed photographs for longer. A self-adhesive version is also available, ideal for albums, scrapbooking and decorations. Sets in 20, 50 or 50 sticker-sheet variants provide convenient, straightforward use and easy replacement of consumables.

Full product description

Sharp photos and durable prints

Paper and cartridges for **Xiaomi Portable Photo Printer Pro** form a home photo printing set that focuses on vivid colours, clear detail and the durability of finished prints. It is a solution for people who want to print photos straight after taking them and keep their appearance for longer.

Key benefits

- **Dye-sublimation technology** – delivers photos with clear tonal transitions and accurate detail reproduction.
- **High-density ink** – provides насыщенные colours and reduces the effect of a flat, faded print.
- **Automatic lamination** – protects prints from moisture and fading after printing.
- **Self-adhesive paper version** – makes it easy to create stickers, decorations and album pages.
- **Compatibility with three paper variants** – 20 sheets, 50 sheets and **50 sticker sheets** for different uses.
- **Simple cartridge and paper handling** – shortens the time needed to prepare the device for use.

Colours visible in detail

Xiaomi's specialist photo paper works with the printer so that the print retains rich detail and realistic colours. Thanks to the uniform sheet surface, photos look clear even with small elements such as backgrounds, clothing textures or fine patterns. This matters when you print travel

photos, family gatherings or shots for an album.

Protection against moisture

Each photo receives **integrated automatic lamination** during printing. This layer reduces the impact of moisture and slows fading, so prints keep the look of the day they were printed for longer. It is a practical solution if the photos go into albums, frames or are often looked through.

Self-adhesive photos

The **self-adhesive** version gives greater freedom than ordinary photo paper. Prints can be peeled off and stuck down, and can also be cut to the chosen format if you need a smaller decoration or label. This variant works well for scrapbooking, on fridges, in notebooks and wherever quick placement of a photo without extra accessories matters.

Convenient paper handling

Loading the paper is straightforward: simply open the feeder, insert the whole stack and align it according to the marking. The tray holds up to **10 sheets** of standard photo paper or **5 sheets** of photo stickers at a time. This lets you print in batches without having to add material frequently.

Easy cartridge replacement

You replace the ink cartridge after opening the cover and inserting a new unit, without unnecessary intermediate steps. The manufacturer recommends not touching the cartridge surface or the glossy side of the paper, which protects print quality. This is important when printing photos regularly and you want to maintain a consistent result from the first to the last print.

For albums and decoration

This photo paper and the cartridges are suitable for everyday home use and creative projects. Prints can be included in albums, planners, greeting cards or used as decorative stickers. Compatibility with **20-sheet**, **50-sheet** and **50-sticker** paper makes it easy to choose the right supply for your printing frequency.
