### Information:

Xiaomi Zoom Floor Selfie Stick Tripod is a versatile 2-in-1 selfie stick and floor tripod that makes it easier to create stable photos and videos. The extendable mast up to 160 cm allows for wide shots, group photos and a natural eye-level perspective. The sturdy, lightweight aluminium construction with a wide base and silicone pads ensures stability even on uneven ground. The magnetic Bluetooth remote enables remote zoom control, camera switching and operation from up to 10 m away. The rotating holder allows you to quickly change your phone's orientation, and the cold shoe mount provides the option to attach a microphone or light. Ideal for creators, travellers and video calls.

## Full product description

### Stability and wide framing

Xiaomi Zoom Floor Selfie Stick Tripod is a multifunctional tool that **makes creating professional content** easier. Thanks to the **extendable mast up to 160 cm** and the tripod's stable construction, the product offers great freedom in choosing the perspective. The **magnetic Bluetooth remote** enables remote control of camera functions, helping you capture dynamic moments without the help of others.

### Key advantages

- **Height up to 160 cm:** Enables you to capture very wide shots and group photos effortlessly.
- **Multifunctional remote:** Offers full control over zoom and camera modes from a distance of up to 10 metres.
- **2-in-1 design:** Serves as a handy selfie stick and a stable floor tripod.
- **Quick-deploy system:** Helps you prepare the equipment for use in an instant with a single motion.
- **Cold shoe mount:** Allows easy expansion of the set with external microphones or light panels.

### Long-reach boom arm

The device's design is based on a 10-section **aluminium** arm, which reaches 62 inches when fully extended. This height **allows photos to be taken at eye level**, giving shots a natural look. The material is light and durable, and the anodised surface makes it easier to hold securely during use. This solution offers versatility during walks and outdoor shoots.

### Stable tripod base

The use of wide-spread legs and a design based on a **zinc foot** helps maintain balance even on uneven ground. The one-touch unfolding mechanism means preparation takes only a moment. In addition, **silicone pads** prevent the equipment from slipping on smooth surfaces, helping to keep your smartphone safe.

### Remote zoom control

The included remote offers advanced functions for users of the **Xiaomi HyperOS** system. It allows **zoom adjustment with 0.1x precision**, giving greater control over the frame composition. With one button, you can also switch between the front and rear camera, which significantly speeds up work on video material and snapshots.

### Rotating phone holder

The integrated clamp allows the device to rotate freely on multiple axes. You can quickly change the orientation from portrait to landscape, which is crucial when creating content for different social media platforms. The mechanism **keeps the phone securely in place** in the chosen position, helping to eliminate shake when recording videos on the move.

### Space for accessories

The upper part of the holder hides a **cold shoe mount**, which allows additional lighting or adapters to be attached. This functionality helps improve recording quality in difficult lighting conditions. This solution turns the tripod into a complete workstation for any mobile creator, offering options to expand the set with LED lamps.

### Who is this product for?

- For **video creators** on social media who need stable, shake-free shots.
- For travellers looking for a **lightweight and compact** tripod that fits in a backpack.
- For people running **video conferences** and live streams from anywhere.
- For mobile photography enthusiasts who value **remote control** and creative viewing angles.
