Full product description

BetaFPV Aquila20 FPV Kit: Become a master of flight

The BetaFPV Aquila20 FPV Kit is a unique kit that allows you to fully immerse yourself in the world of FPV drones. Designed with enthusiasts and professionals in mind, the **Aquila20 FPV Kit** offers exceptional image quality and flight versatility. With precise controls and advanced technology, you'll be able to develop your piloting skills, from the basics to the advanced level

Complete FPV Kit

The BetaFPV Aquila20 FPV Kit is a complete FPV kit that includes everything you need to start your flying adventure. In the kit, you'll find the Aquila20 drone, VR04 goggles, and a LiteRadio 4 SE transmitter, so you can start flying immediately. With the kit, everything you need is in one package to fully enjoy the flying experience.

Long Range FPV Transmission

The kit includes a **350mW video transmission system** that provides a stable connection over 200 meters. Thanks to these parameters, the Aquila20 FPV Kit allows you to fly comfortably without worrying about losing the signal, offering **comfort** and confidence during maneuvers. The quality of the image displayed in the VR04 goggles allows full immersion in FPV reality

Innovative Flight Modes

The Aquila20 FPV Kit offers **four different flight modes** (N, S, M and Turtle) that allow you to adjust the level of difficulty to your own skills. In **N (Normal) mode**, you can fly in a more relaxed manner, while **S (Sport) mode** allows for faster and more dynamic maneuvers. **The M mode** is the ideal choice for the advanced, while **the Turtle mode** allows you to turn the drone around in case of a malfunction, ensuring greater safety in flight.

Precision Control LiteRadio 4 SE

Included in the kit you will find a **LiteRadio 4 SE transmitter**, which offers precise control of the drone. With **ExpressLRS** (Low Latency Radio System), you are assured of fast and reliable communication between the drone and the controller. **BetaFPV** has designed this device to meet the requirements of both beginners and more advanced users.

Professional Goggles VR04

The VR04 goggles, which are included in the kit, offer convenience as well as high image quality during flight. Thanks to **the high-resolution screen**, you are assured of a perfect view of every movement of the drone. The goggles are designed to keep you comfortable for long hours without tiring your eyesight

Lightweight Drone Design

The Aquila20 is a **lightweight drone**, weighing just 119g, providing maneuverability and ease of maneuvering, as well as long flight time. **The PA frame material**, on the other hand, increases durability, making it resistant to minor impacts and shocks. With this design, the Aquila20 FPV Kit is an ideal choice for learning to fly and performing more advanced tricks
