Manufacturer: EXTRALINK

Referention number: DNXXGKIIKERMLMQ

Information:

Extralink AI-5 Pro is a modern fibre optic splicer combining speed, precision and ease of use. It starts up in 3 seconds thanks to a 4-core processor, completes a splice in 8 seconds, and heats the sleeves in 18 seconds. The universal 3-in-1 holder makes it easy to work with single-mode and multi-mode fibres, while the 5-inch LCD screen with 300x magnification provides full control over the splice. 6 motors guarantee accurate positioning, and the 5200 mAh battery allows for long periods of field work. The lightweight 1,9 kg design, Bluetooth, LED, sturdy case with accessories, and resistance to dust, shocks and temperatures from -15°C to +50°C make it a reliable tool for FTTH, LAN and backbone network installations.

Full product description

Precision splicing at express speed

Extralink AI-5 Pro is a modern fibre optic splicer that combines intuitive operation with advanced technology. Thanks to the use of a **4-core processor**, the device is ready to work in just 3 seconds, and the **universal 3-in-1 holder** allows for lightning-fast preparation of single-mode and multi-mode fibres. The **built-in LED lamp** guarantees full efficiency even in difficult lighting conditions or complete darkness.

Maximum efficiency and excellent specifications

Gain the advantage thanks to the fastest operating cycles in this price class – the **splicing time is just 8 seconds**, and sleeve shrinking takes only 18 seconds. Such high efficiency directly translates into faster project completion, from home FTTH installations to **extensive fibre optic backbones**. Precision goes hand in hand with time savings here, making this model an unrivalled tool for professionals.

Full control on a large screen and a powerful battery

Enjoy exceptional working comfort thanks to the **5-inch high-resolution LCD display**, which provides 300x image magnification for precise splice analysis. The advanced system based on **6 high-end motors** guarantees perfect core alignment, and the **5200 mAh** battery allows for long hours of field work without the need for frequent charging. In addition, the built-in **Bluetooth** module enables full configuration of settings directly from a smartphone.

Lightweight design and a complete set of accessories

Mobility without compromise – the splicer weighs only **1.9 kg**, which, combined with its compact dimensions, makes transport easy on any construction site. The set includes a **practical case and a full set of tools**, including a precision cleaver and strippers, so you are ready to work immediately after unpacking. The sturdy housing protects the equipment, ensuring durability during intensive use.

Praktyczna torba w zestawie oraz zestaw akcesoriów

Reliable operation in all climatic conditions

Don't let the weather dictate the conditions of your work - the Extralink AI-5 Pro maintains full performance across an extreme temperature range from **-15°C to +50°C**. The robust design has been created to meet the challenges of both freezing winter and scorching summer. This gives you confidence in **stable splicing parameters** regardless of the location where you are carrying out the job.

ZAKRES TEMPERATURY ROBOCZEJ

Durability suited to difficult terrain

Designed for work in demanding environments, the splicer features a **dustproof, frost-resistant and shock-resistant** construction. It is the ideal tool for installation in server rooms, video surveillance systems and difficult installation conditions. By choosing this model, you get equipment that will withstand the rigours of everyday use in **various work areas**:

- LAN installations and backbone networks
- Video surveillance systems
- 100 km fibre optic backbones
