Price: **63.65 zł** gross / 51.75 zł net

Referention number: DNXGFNHOMRMMNI

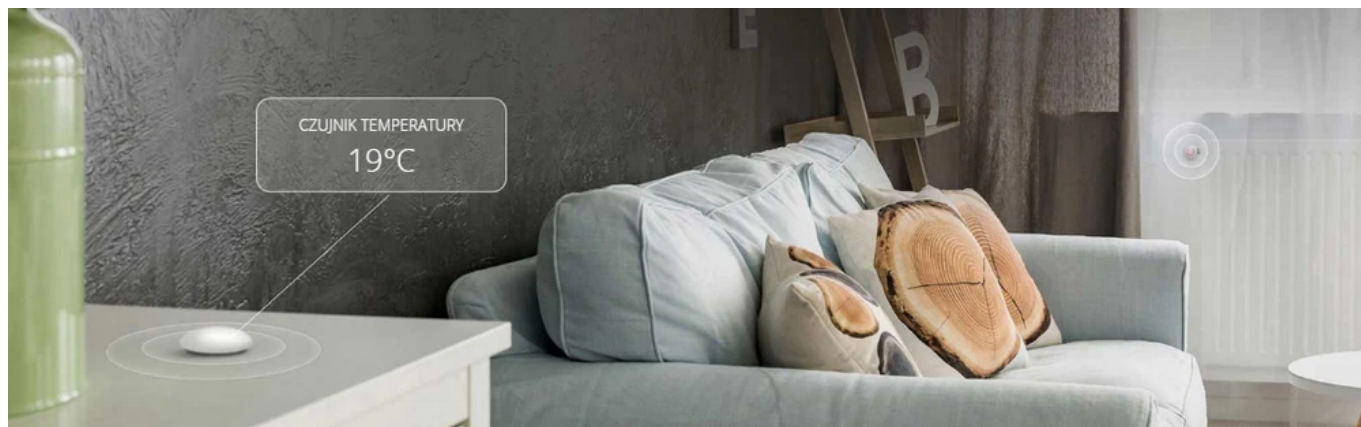

Product features

Regulatory Approvals	RED 2014/53/EU
Height	12 mm
Cartridge type	CR2032
Sensor type	Temperature sensor
Width	38 mm
Depth	38 mm
Connectivity technology	Wireless
Storage temperature (T-T)	-10 - 25 °C
Compliance certificates	RoHS
Battery voltage	3 V
Step precise	0.5 °C
Operating temperature (T-T)	0 - 40 °C
RF transmission frequency	2400 MHz
Built-in display	No
Type	Freestanding
Designation	Indoor

Full product description

Ergonomic design Temperature Sensor

FIBARO Temperature Sensor is a dedicated temperature sensor for **Heat Controller**, which provides **more accurate readings** and **proper room temperature control**. The **ergonomic shape** of the sensor makes it easy to operate, **inspired by nature** harmonizes well with interior design.

Sends measurement to three Heat Controllers

For each **Heat Controller** head, only one sensor can be **paired**, which will be used as **reference point** temperature, but each temperature sensor supports up to three thermostatic heads, i.e., to sum up, one sensor can operate with up to three heads, while one head can operate with only one sensor. The temperature sensor can be placed or mounted anywhere thanks to its **wireless** communication.

Features FIBARO TEMPERATURE SENSOR FGBRS-001:

- Simple and quick installation without tools
- Compatible with FIBARO The Heat Controller thermostatic head
- Can be paired with three thermostatic heads
- Ergonomic design
- Small dimensions
