Price: **202.86 zł** gross / 164.93 zł net

Manufacturer: EXTRALINK

Referention number: DNXGKIIMERMLOM

Information:

Extralink water filter bag is a practical, gravity-fed water purification system for use in the field, while camping, fishing, survival expeditions and rescue operations. Without the use of electricity, it allows water to be drawn from rivers, lakes and streams, providing a safe drink in difficult conditions. Four-stage filtration removes solid contaminants, up to 99% of heavy metals, up to 90% of chemical compounds and 99.9999% of bacteria. The valve makes it easy to fill bottles, and the option to hang it up increases ease of use. The bag has a capacity of 10 l, is made of safe, BPA-free ABS plastic and can filter up to 10000 litres of water.

Full product description

Clean water in every outdoor situation

Whether you are отдых? No, whether you are relaxing under a tent, fishing by a lake, or taking part in a rescue operation, access to safe drinking water can be crucial. This practical system allows you to draw water from natural reservoirs and streams, keeping you safe on every trip. The design based on **gravity filtration** works **without electricity**, which means that the **Extralink water filtration bag** comes to the rescue wherever traditional conveniences are lacking.

Niezbędny w każdej sytuacji

Four-stage protection against contaminants

The advanced design of the filter cartridge traps unwanted elements at several different levels. The **microfiltration filter** separates solids, and a special **absorbent material filter** removes up to **99% of heavy metals**. In addition, the **activated carbon filter** (coconut carbon) absorbs **90% of chemical contaminants** and eliminates unpleasant odours, while the advanced **hollow fibre UF filter** effectively removes up to **99.9999% of bacteria**.

4-STOPNIOWY SYSTEM FILTRACJI

FILTR MIKROFILTRACYJNY

Odfiltrowuje zawieszone ciała stałe

FILTR Z MATERIAŁU ABSORBUJĄCEGO

Usuwa 99% metali ciężkich

FILTR Z AKTYWNEGO WĘGLA

Absorbuje 90% zanieczyszczeń
chemicznych

FILTR UF Z WŁÓKNA HOŁOWEGO

Usuwa 99,9999% bakterii

Convenient hanging and easy filling of containers

The thoughtful design allows the **bag to be hung freely anywhere** - on a tree branch or a tent structure - enabling effortless use of the water supply. The integrated **valve with a handy knob** makes filling bottles and camping containers extremely simple and smooth. This purification method makes everyday life at the campsite easier without the need for manual pumping.

MOŻLIWOŚĆ ZAWIESZENIA WORKA W DOWOLNYM MIEJSCU

Zawór umożliwia
wygodne napełnianie butelek

Complete filtration of natural water sources

The system offers the possibility of **direct filtration of natural water** from rivers, streams or lakes, effectively dealing with troublesome external factors. The special **0.01 µm UF membrane** and **PP filter** help remove threats such as **solid particles, rust, sediment, heavy metals and microorganisms**. This process also effectively eliminates **unpleasant taste and odour**, giving you safe drinking water in harsh forest conditions.

WYDAJNA FILTRACJA

Możliwość bezpośredniego filtrowania wód naturalnych

Filtr PP

- Cząstki stałe
- Rdza
- Osad
- Zapach
- Nieprzyjemny smak
- Kamienie
- Metale ciężkie
- Mikroorganizmy

Membrana UF 0,01 μm

Safe materials and high performance for longer

The construction made of durable **ABS plastic** is completely **BPA-free** and fully **safe for contact with food**, allowing you to drink water without worry at any time. The large **10-litre capacity** means fewer trips to the river and helps secure supplies for the whole camping group. The robust system can produce up to **10,000 litres of filtered water**, offering long-term support during long journeys.

Key equipment for your evacuation backpack

The bag is an **excellent addition to a home emergency kit** and survival kits. Alongside items such as a dust mask, first aid kit, thermal blanket or power bank, constant access to clean water is the foundation of safety. The **lightweight, foldable design** takes up minimal space when packed, making it easy to carry and convenient to fit into any backpack.

Doskonały element domowego zestawu awaryjnego

WOREK DO FILTROWANIA

1. Maseczka przeciwpyłowa
2. Baterie
3. Otwieracz do puszek
4. Żywność wysokokaloryczna

5. Woda
6. Apteczka
7. Zapalniczka
8. Koc termiczny
9. Kopie dokumentów
10. Gotówka
11. Powerbank

Technical specification

Parameter	Value
Bag capacity	10 litres
Filtration type	Gravity (four-stage)
Filtration system elements	PP filter, iodine resin, coconut carbon, 0.01 µm hollow fibre UF membrane
Membrane filtration accuracy	0.01 µm
Bacteria removal efficiency	99.9999%
Heavy metal removal efficiency	99%
Chemical reduction efficiency	90%
Maximum filter life	up to 10,000 litres (depending on the quality of the input water)
Material	ABS plastic (BPA-free, safe for contact with food)
Power supply	None (mechanical operation)
Design features	Foldable and lightweight construction, integrated shut-off valve with knob, hanging handle
Application	Camping, hiking, survival, evacuation and emergency kits
