Information:

StayBeauty by Extralink Nail Drill Masterpiece is a 65 W manicure and pedicure drill designed for working on nails and cuticles and removing residue from previous treatments. Equipped with the balanced H20N head with Twist-Lock system, it allows quick tool-free bit changes and reduces vibration, ensuring smooth operation. Stepless speed control up to 30,000 RPM lets you adjust the pace to the treatment, while the foot pedal makes hands-free control easier. Additional bit holders, a double-sided holder and a silicone stand help keep the workspace tidy and comfortable.

Full product description

Manicure and pedicure

StayBeauty by Extralink Nail Drill Masterpiece is a 65 W nail drill designed for working on the nail plate and cuticles. The device helps prepare nails for the next stages of styling and remove remnants of previous product layers.

H20N Twist-Lock head

The balanced H20N head is equipped with a Twist-Lock mechanism. It enables quick bit changes without the need for additional tools. The head design helps reduce vibration and supports smooth bit control during manicure or pedicure treatments.

Adjustment up to 30,000 RPM

The dial on the housing allows smooth speed adjustment up to 30,000 rpm. It lets you match the intensity to the task at hand and the type of bit being used. The indicator light shows when the device is operating at minimum speed.

Foot pedal control

The included foot pedal allows you to control the head without taking your hands away from the treatment. This solution makes it easier to maintain control over the bit and lets you focus on the nail area being worked on.

Order at the workstation

The drill housing has spaces for bits, helping keep the necessary tips within easy reach. The head holder can be mounted on either side of the device, and the silicone stand allows you to conveniently place the handpiece down during breaks in work.
