Full product description

Advanced technology for healthy, well-groomed hair

EXTRALINK hair dryer is a device designed for fast, comfortable and safe drying. It uses **a state-of-the-art 110000 RPM brushless motor** that generates a powerful, concentrated stream of air without the risk of overheating the hair. This makes everyday styling easier and leaves strands full of shine. It's ideal for those who appreciate modern devices that combine efficiency with gentleness for hair.

3-in-1 function for diverse styling

The device allows for both quick drying, modeling and creating delicate curls. There are **4 levels of temperature** and **3 levels of blowing speed**, so it's easy to adjust the parameters to your hair type. The built-in cool air helps to fix the hairstyle, and the ergonomic shape of the device definitely makes it easier to use on a daily basis. It's an excellent choice for those who want to get a result like after a visit to the hairdresser.

Work safety and hair protection

EXTRALINK has made sure that styling is not only comfortable, but above all safe. **The concentrated airflow** minimizes the risk of dryness, and the even temperature keeps hair naturally smooth. LED indicators indicate the current temperature settings, giving you full control while drying. This solution is ideal for those with fine, thin or vulnerable hair.

Four professional styling tips included

The dryer comes with a set of **4 tips** that allow you to create multiple hairstyles without additional equipment. The diffuser increases volume and accentuates curls, the concentrator helps with precise modeling, the smoothing nozzle adds shine and smoothness, and the **Coanda effect** tip lifts hair at the roots and makes styling easier. A magnetic attachment system makes it easy to quickly change accessories during styling.

Convenience, lightweight and ideal for daily care

EXTRALINK dryer weighs only 0.5 kg, which significantly increases the comfort of use and avoids hand fatigue. Thanks to the power of **1500 watts**, the device works quickly and efficiently, and the long cord makes it easy to make movements without restrictions. It's a great choice for both everyday drying and full styling before an important outing. The device will work well for anyone who appreciates convenience and multitasking.

A set of features and a solid specification

The dryer offers **4 temperature modes**, **3 air speed modes**, a cold air system and filter cleaning information through flashing LED lights. You will receive the dryer, four styling tips, an instruction manual and a handle for easy storage. The whole thing is CE, ROHS and FCC safety certified, which confirms the high quality and reliability of the device. It's ideal for people who expect more than just basic hair drying.
