Manufacturer: MOMCOZY

Referention number: DNKGJOINGRMMKJ

Information:

Momcozy BC003 is a discreet 90 ml breast milk collector designed to gather milk that leaks during feeding or pumping from the other breast. Its lightweight design (82 g) and soft, thicker food-grade silicone ensure comfort, a good fit and no irritation. The transparent body with measurement markings makes it easy to monitor the amount of milk, while the stable base and shaped spout help store and pour the milk safely without spilling. The product is reusable, BPA-free and easy to clean; it can be washed in a dishwasher or in warm water. It is a practical, hygienic and eco-friendly solution for mums who want to make use of every drop of milk.

Full product description

Momcozy BC003 - Innovative 90 ml breast milk collector

The **Momcozy** BC003 product is a discreet and highly practical solution created for women who want to make full use of every drop of precious milk. This **collector** is designed to **collect milk** flowing from the breast during **breastfeeding** or while expressing milk with a breast pump from the other breast. Thanks to its lightweight design, weighing just 82 g and with a 90 ml capacity, **momcozy** allows you to efficiently **collect** milk without the need to use a traditional breast pump in situations where milk flows spontaneously.

Comfort and premium silicone material

The key to comfort is the use of a **soft silicone material that adapts** perfectly to the shape of the breast, causing no irritation. The **collector** is made of thicker, liquid food-grade silicone, which ensures exceptional wearing **comfort**. The specially widened nipple area (by an additional 5 mm) makes **fitting** even easier, and the curved **design** allows the device to be discreetly placed inside a **breastfeeding** bra. As a result, every **breastfeeding mother** can enjoy closeness with her baby while ensuring that **breast milk remains clean** and ready to serve.

Collect and store - a functional container for precious milk

This transparent **container** with a 90 ml capacity allows you to monitor the amount of liquid collected in real time thanks to the clear scale. The **momcozy collector** has a stable base, so it can be safely placed on a table after collection, minimising the risk of accidental **leakage** or tipping over. It is a **reusable** product that is an excellent and economical alternative to a **disposable** nursing pad. The **precious milk** collected in this way can then be poured into a bottle or frozen for **storage** for later use.

Care and safety - easy-to-clean silicone

Maintaining the highest hygiene standards with **momcozy** is extremely simple. The device is completely **BPA-free** (standard **BP**), which guarantees that **breast milk remains clean and safe** for the infant. The smooth interior makes the **collector easy to clean**, as it has no dead spots where residue could build up. The **container** can be **cleaned** in a dishwasher or washed in warm water (below 100°C). The **silicone** is resistant to frequent sterilising, making **momcozy** an investment in a durable and hygienic solution for the entire lactation period.

Łezkowaty kształt ułatwia przelewanie

Specjalnie zaprojektowany dzióbek
zapewnia łatwe i precyzyjne
przelewanie mleka bez rozlewania.

Stoi stabilnie

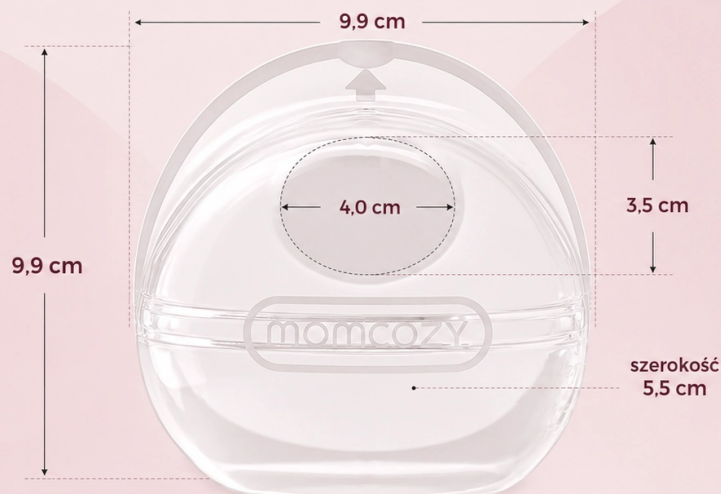

Płaska podstawa zapobiega
przewracaniu się i rozlewaniu mleka.

Easy control of milk volume and stable use

Thanks to the fully transparent material, **momcozy** allows you to monitor the milk collection process in real time. Every **mother** can easily check how much has been **collected** at any given moment, which makes planning the next **feed** easier. The specially shaped spout means that you can **express** and pour the **precious milk** into a bottle without the risk of spilling, helping you keep things tidy in any situation. This **collector** is not only a tool, but above all **comfort** and the assurance that the **milk collection** process is controlled and completely hygienic.

Why choose the Momcozy collector?

- **Efficiency** – allows you to **collect** milk that would otherwise be absorbed by a nursing pad.
- **Discretion** – the shape of the collector ensures a **comfortable and secure fit** inside the bra.
- **Eco-friendliness** – the **reusable** product eliminates the need for disposable accessories.

- **Safety** – certified **silicone** material without toxic substances.
- **Ease of use** – simply place it on the breast and it will start **collecting milk** without any extra effort.

The product is ideal for

- **Breastfeeding women** who have a strong let-down reflex from the other breast during feeding.
- **Active mothers** looking for a discreet, hands-free way to collect milk.
- **People who value savings** and want to keep every drop of milk safely.
