### Full product description

### Clean and safe accessories for your baby

Every parent wants to make sure that feeding bottles, pacifiers and accessories are **bacteria-free and safe for baby**. The Momcozy BS01 bottle sterilizer allows you to **sterilize and dry bottles and breast pump parts in one cycle**, saving you time and effort. **The capacious design** allows you to disinfect up to six bottles at once, making the device suitable both at home and on the go.

### Fast and effective sterilization

Steam sterilization in the **Momcozy BS01** takes **just 9 minutes**, allowing you to quickly prepare clean bottles for your baby. Adding **120 ml of clean water** starts the process, which eliminates bacteria and microorganisms, ensuring complete hygiene. Once the cycle is complete, the bottles and accessories are ready for safe use without the need for additional rinsing.

## Automatic drying and long-lasting sterility

After sterilization, you can select the drying function, which takes **from 10 to 60 minutes**, depending on your needs. The bottles remain sterile **for up to 24 hours** if the sterilizer is not opened after the cycle is completed. This convenient solution allows you to safely store your accessories without the risk of recontamination.

## Thoughtful design with large capacity

With its **3-layer design**, the Momcozy sterilizer can accommodate wide- and narrow-necked bottles, pacifiers, teethingers and breast pump parts. Specially designed accessory racks make it easy to place items in the unit, ensuring **evenly distributed steam** and effective sterilization of all items.

## Sterilization of breast pump parts

For moms using breast pumps, Momcozy BS01 offers **a dedicated sterilization mode for lactation accessories**. Thanks to special handles, you can hang the parts of the breast pump, allowing them to be **thoroughly cleaned without leaving moisture**. This solution saves time and makes it easier to take care of the breast pump's hygiene on a daily basis.
