Manufacturer: MOMCOZY

Referention number: DNXXGHJKPFRMMIK

Information:

The Momcozy portable breast milk cooler is a compact and hygienic solution for mums who want to safely store and transport milk away from home. Thanks to Surround Cooling Tube 360° technology, it maintains an evenly low temperature and keeps milk fresh for over 24 hours. The 650 ml capacity and two separate containers make it easy to divide portions conveniently, while the BPA-free construction made from food-grade materials ensures safety. Lightweight, handy and ideal for work, travel and flights, it makes feeding easier in any conditions.

Full product description

Portable breast milk cooler Momcozy

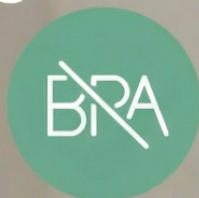

Momcozy is a brand that is revolutionising parents' everyday lives, and their **portable breast milk cooler** is the best proof of that. The device allows you to **preserve** the freshness of milk for over **24 hours**, which is crucial for maintaining its full nutritional value. Thanks to this innovation, every **mother** can enjoy freedom, knowing that **breast milk** is safe even during all-day trips. The professional **cooler** makes **feeding** away from home simple and fully hygienic.

Nie wymaga
lodu

Milk cooler and 360° cooling technology

At the heart of the device is advanced surround cooling tube **360°** technology, which guarantees even temperature reduction inside the container. This **Portable Milk Cooler** has an increased capacity of **22oz** (approx. 650 ml), allowing it to meet a child's nutritional needs throughout the day. The **milk cooler** works much more effectively than a traditional thermal **bag**, because it steadily maintains coolness around the entire surface of the bottle. This **portable** system is a real breakthrough in the category of mobile **coolers** for active parents.

Dwa proste kroki = 24 godziny chłodzenia

Nie potrzeba dodatkowego lodu

1

Zamrażaj w zamrażalniku
(ok. -18°C) przez około 12 godzin

2

Włóż z powrotem do termosu
i ciesz się karmieniem

Storage container and feeding accessories

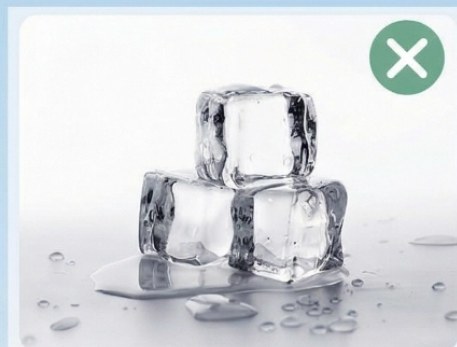

Inside the set you will find two separate bottles, allowing you to hygienically **express** and separate warm and chilled **breast milk**. This system prevents mixing fractions of different temperatures, which is crucial for maintaining the quality of milk intended for **Feeding**. The **container** is fully compatible with the **baby bottle** system, supporting the natural process of **breastfeeding** by making it easier to feed expressed milk. These are essential **feeding accessories** that should be part of every modern mum's baby kit.

Portable thermos for mums on the move and at work

This **compact** and **portable Milk Cooler** has been designed with women returning to work or those who love travelling in mind. The **cooler** easily passes airport security checks, allowing stress-free transport of **breast milk** on board an aircraft. **Momcozy** has ensured that the **milk cooler** is handy and elegant, eliminating the need to carry bulky cool boxes. As a result, **storing breast milk** in the office or on the road becomes discreet and exceptionally comfortable.

Chłodzenie bez wysiłku i bez użycia lodu

Ograniczone chłodzenie,
lód szybko się topi

Trudności ze znalezieniem
odpowiednich kostek lodu

How to store breast milk - product reviews

Milk safety is a priority, which is why the **milk cooler** by **Momcozy** is made from food-grade materials and is completely BPA-free. The ability to wash and sterilise the inner bottles in bottle washer devices allows you to quickly prepare the set for re-**storing milk**. By choosing this **portable** system, you can be sure that you can safely **store** milk in any weather conditions. Numerous positive product reviews confirm that **Momcozy** is a leader in providing solutions that make **feeding** babies easier.

Gwarantowane bezpieczeństwo i niezawodność
