Manufacturer: MOMCOZY

Referention number: DNXGJOIQFRMMLLO

Information:

Momcozy GC01 Dinerpal Wooden High Chair is a multifunctional 5-in-1 high chair that grows with the child and can also be used as a learning tower, a step stool, a chair for an older child, and even a stable seat for adults. Made from solid FSC beech wood, it has a sturdy triangular structure, non-slip silicone feet, and a load capacity of up to 140 kg. It offers tool-free height adjustment across 7 levels and seat depth adjustment across 2 levels, supporting an ergonomic position. The wide BPA-free tray is dishwasher-safe, and the 5-point harness with soft shoulder pads increases safety and is easy to wash.

Full product description

Momcozy GC01 Dinerpal Wooden High Chair - Wooden feeding chair

Momcozy GC01 Dinerpal Wooden High Chair is a multifunctional chair designed to support children's physical development during meals and play. This stable product makes everyday feeding easier, providing the right fit for the changing needs of a growing toddler. Thanks to the **5-in-1 design**, the chair can be successfully transformed at different stages of life, serving as a traditional high chair, learning tower, step stool, chair for an older child, and even a stable seat for an adult. Its thoughtful construction means the frame **supports loads of up to 140 kg**, ensuring long-term use in any home.

5 w 1. Dopasowane do potrzeb

Beech wood construction and stable design

The Momcozy Dinerpal model is built on a stable, triangular frame made of **solid FSC-certified beech wood (Forest Stewardship Council)**, which has been precisely finished with no risk of splinters. The base is fitted with **non-slip silicone feet**, which effectively prevent the structure from moving or tipping while an active child is seated. The chair meets the stringent international ASTM (American Society for Testing and Materials) and EN (European Standard) safety standards, confirming its high durability. The wooden elements are easy to care for, although the manufacturer recommends not using alcohol-based cleaning products on them.

Mniej bałaganu, mniej stresu

Tool-free adjustment - multifunctional children's chair

The device stands out thanks to its intuitive system for adjusting individual modules. The seat, which is 16 inches wide (approximately 40.6 cm), has two depth settings, allowing consistent comfort regardless of the user's height. The footrest and seat can be set to **7 different height levels** using a simple click mechanism - just press and slide the element into the appropriate grooves, **without the need for tools**. This flexibility means the adjustable chair helps maintain a correct, ergonomic posture with a 90-degree angle at the knees.

Wide tray and easy cleaning as standard for convenient use

An integral part of the Momcozy Dinerpal set is a 9.25-inch-wide (approximately 23.5 cm) tray made from BPA-free (Bisphenol A) plastic. The generous width of the tabletop means it fits most standard suction bowls, preventing them from being knocked over by the child. This element can be easily removed with one hand. A dirty dishwasher will easily **accommodate the tray in its racks**, making it easier to maintain hygiene after meals. In addition, the chair surfaces can be easily wiped with a damp cloth, quickly removing food residue.

Safety straps for complete protection

To ensure the child remains in a stable position, the chair is fitted with **five-point safety straps** with soft shoulder pads. This strap configuration reduces pressure on the toddler's shoulders while providing proper support for the torso. The fastening system prevents the child from slipping out when a lively toddler or younger infant sits in the chair. The entire harness can be easily detached from the frame and **machine washed**, which significantly improves the hygiene of this accessory as children learn to eat independently.
